Title: Impact of Industry-Engineering Research Center (ERC) Interaction and Effectiveness of ERC-Trained Industrially Employed Engineers.

OMB Control Number: 3145-0153.

Summary of Collection

Proposed Project: NSF's Directorate for Engineering established the Engineering Research Center (ERC) Program in 1985 to address concerns of industry regarding declining U.S. industrial competitiveness. The mission of the Program as defined by the National Academy of Engineering was to strengthen competitiveness by bringing new approaches and goals to academic engineering research and education, and by forging vital new links between universities and industry. The proposed study repeats one

conducted when the Program was 10 years old, which studied the outcomes and impacts of ERC involvement upon firms involved with first generation centers. The report study would involve firms formally participating with the eight second-generation centers, which were initiated from FY 1994-96. Data will be collected from the representatives to the ERCs of these firms. Data will NOT be used to evaluate individual centers, but, rather, to study the Program's on-going as a whole.

Use of the Information: The resulting information will be used to identify program-wide patterns of outcomes and impacts on organizations that are members of ERCs. Results will be used for continuous program performance improvement and external reporting, e.g., for the Government Performance and Results Act.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 30 minutes per response.

Respondents: Individuals.

Estimated Number of Responses Per Form: One.

Estimated Number of Respondents: 291.

Estimated Total Annual Burden on Respondents: 146 hours.

Frequency of Responses: One time.

Dated: February 4, 2002.

Suzanne H. Plimpton,

Reports Clearance Officer.

AGENCY: Nuclear Regulatory Commission (NRC).

ACTION: Notice of the OMB review of information collection and solicitation of public comment.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

1. *Type of submission, new, revision, or extension:* Revision.

2. *The title of the information collection:* 10 CFR part 72, Licensing Requirements for the Independent Storage of Spent Nuclear Fuel and High-Level Radioactive Waste (3150-0132).

3. *The form number if applicable:* NA.

4. *How often the collection is required:* Required reports are collected and evaluated on a continuing basis as events occur; submittal of reports varies from less than one per year under some rule sections to up to an average of about 100 per year under other rule sections. Applications for new licenses, certificates of compliance (CoCs), and amendments may be submitted at any time; applications for renewal of licenses would be required every 20 years for an Independent Spent Fuel Storage Installation (ISFSI) and every 40 years for a Monitored Retrievable Storage (MRS) facility. Application for renewal of a CoC would be required every 20 years.

5. *Who is required or asked to report:* Certificate holders of casks for the storage of spent fuel, licensees and applicants for a license to possess power reactor spent fuel and other radioactive materials associated with spent fuel storage in an ISFSI, and the Department of Energy for licenses to receive, transfer, package and possess power reactor spent fuel, high-level waste, and other radioactive materials associated with spent fuel and high-level waste storage in an MRS.

6. *The estimated number of annual responses:* 201.

7. *The estimated number of annual respondents:* 33.

8. *The number of hours needed annually to complete the requirement or request:* 41,283 hours (27,777 hours for reporting plus 13,506 hours for recordkeeping) or approximately 1,251 hours per respondent.

9. *An indication of whether Section 3507(d), Pub. L. 104-13 applies:* NA

10. *Abstract:* 10 CFR part 72 establishes requirements, procedures, and criteria for the issuance of licenses to receive, transfer, and possess power reactor spent fuel and other radioactive materials associated with spent fuel storage in an ISFSI, and requirements for the issuance of licenses to the Department of Energy to receive, transfer, package, and possess power reactor spent fuel and high-level radioactive waste, and other associated radioactive materials, in an MRS. The information in the applications, reports and records is used by NRC to make licensing and other regulatory determinations. The revised estimate of burden reflects and increase primarily because of live rulemakings completed (and approved by OMB) since the last
