DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 660

[I.D. 010802C]

Fisheries off the West Coast States and in the Western Pacific; Pacific Coast Groundfish Fishery

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability; request for comments.

SUMMARY: NMFS has prepared a report that summarizes the results of the scoping process to date for a comprehensive environmental impact statement (EIS) on Federal management of the Pacific Coast Groundfish Fishery. As a result of public comments received during the scoping process, NMFS has improved its approach to the EIS through development of an enhanced description of the purpose and need for NMFS action, a clear identification of significant issues related to the proposed action, and a distinction of certain elements of the proposed action related to essential fish habitat (EFH) from the broader management program for Pacific groundfish. To avoid confusion as a result of this distinction, NMFS will prepare two separate EISs. The intent of this document is to announce the availability of the scoping summary and to describe the rationale for preparing two EISs.

DATES: Written comments will be accepted on or before March 11, 2002.

ADDRESSES: Copies of the scoping report may be obtained during business hours at the office of the NMFS Northwest Regional Administrator. The scoping report is also available on the NMFS, Northwest Region's website at www.nwr.noaa.gov/1sustfsh/groundfish/gf-eis.

Written comments on the scoping report should be submitted to D. Robert Lohn, Northwest Regional Administrator, NMFS, 7600 Sand Point Way N.E., Bin C15700, Bldg. 1, Seattle, WA, 98115-0070. Comments also may be sent via facsimile (fax) to 206-526-6737. Comments will not be accepted if submitted via e-mail or the internet.

Background

NMFS has concluded the initial scoping process for an EIS on the Federal management of the Pacific Coast Groundfish Fishery and has published a summary report. Scoping was initiated on April 10, 2001, through publication of a Notice of Intent (66 FR 18586). The report was initially published on the NMFS, Northwest Region website in August, 2001, to provide a summary of all comments received and key issues identified during the scoping process. In contemplation of these comments and issues, NMFS has taken advantage of the scoping process to clarify the purpose and need for Federal action and to revise the scope of analysis. This clarification will result in the preparation of two separate EISs. One EIS will be a broad analysis of the Federal management program, and the other will be specific to the designation of EFH and associated management measures, including measures to reduce effects of fishing on EFH. NMFS believes this separation will improve public understanding and participation in the National Environmental Policy Act (NEPA) process, make each EIS more useful in future management decisions, and, more clearly, distinguish between programmatic and specific EFH issues. NMFS' goals in preparing these EISs are as follows:
