The draft guidance document provides FDA's recommendations to all registered blood and plasma establishments, and establishments engaged in manufacturing plasma derivatives. The draft guidance document, when finalized, is intended to provide recommendations regarding the disposition of blood products manufactured from a donor who is retrospectively discovered to have received a xenotransplantation product or to have been an intimate contact of a xenotransplantation product recipient. This second draft guidance document incorporates revisions based on public comments received on the first draft document by the same name announced in the **Federal Register** of December 30, 1999, due to the number of changes made to the previous version of the draft guidance.
