

second alternative considered herein explores the possibility of using alternative dialing schemes (such as 555 numbers and abbreviated 411XX dialing codes). National 555 numbers were created to provide a variety of information and telecommunications services. In addition, 555 numbers and 411XX codes could be used instead of the alternative of 411 presubscription. Further comment on these thoughts is included in paragraphs 47 through 52 of the *NRPM*. These alternatives could be easier to implement and less costly for small businesses to enter the market. Both of these alternatives are designed to open the local DA market to competition. Our belief is that by enhancing competition, we have created a space for small businesses to enter the market.
