In this collection request, EIA will ask for approval to conduct the survey for three years beginning January 2003. The emergency clearances and continued approval are intended to continue the weekly data series (produced by the American Gas Association until May 2002) without interruption. Including the EIA-912 in the Fall 2002 clearance proposal will keep all Forms in the Natural Gas Data Collection Program Package on the same schedule. EIA is also requesting comments on the timing of dissemination of the information collected on Form EIA-912. Copies of the draft forms and instructions are available on the EIA Web site [http://www.eia.doe.gov/oil\\_gas/fwd/proposed.html](http://www.eia.doe.gov/oil_gas/fwd/proposed.html).

### III. Request for Comments

Prospective respondents and other interested parties should comment on the actions discussed in item II. The following guidelines are provided to assist in the preparation of comments. Please indicate to which form(s) your comments apply.

#### General Issues

A. Is the proposed collection of information necessary for the proper performance of the functions of the agency and does the information have practical utility? Practical utility is defined as the actual usefulness of information to or for an agency, taking into account its accuracy, adequacy, reliability, timeliness, and the agency's ability to process the information it collects.

B. What enhancements can be made to the quality, utility, and clarity of the information to be collected?

#### As a Potential Respondent to the Request for Information

A. Are the instructions and definitions clear and sufficient? If not, which instructions need clarification?

B. Can the information be submitted by the due date?

C. Public reporting burden for the surveys included in the Natural Gas Data Collection Program Package is shown below as an average hour(s) per response. The estimated burden includes the total time necessary to provide the requested information. In your opinion, how accurate is this estimate for the proposed forms?

(1) Form EIA-176, "Annual Report of Natural and Supplemental Gas Supply and Disposition"; 12 hours per response.

(2) Form EIA-191, "Monthly Underground Gas Storage Report"; 3.6 hours per response.

(3) Form EIA-857, "Monthly Report of Natural Gas Purchases and Deliveries to Consumers"; 3.5 hours per response.

(4) Form EIA-895, "Monthly Quantity and Value of Natural Gas Production Report"; .5 hour per response.

(5) Form EIA-910, "Monthly Natural Gas Marketer Survey"; 2 hours per response.

(6) Form EIA-912, "Weekly Underground Natural Gas Storage Report"; .5 hour per response.

D. The agency estimates that the only cost to a respondent is for the time it will take to complete the collection. Will a respondent incur any start-up costs for reporting, or any recurring annual costs for operation, maintenance, and purchase of services associated with the information collection?

E. What additional actions could be taken to minimize the burden of this collection of information? Such actions may involve the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

F. Does any other Federal, State, or local agency collect similar information? If so, specify the agency, the data element(s), and the methods of collection.

#### As a Potential User of the Information to be Collected

A. Is the information useful at the levels of detail to be collected?

B. For what purpose(s) would the information be used? Be specific.

C. Are there alternate sources for the information and are they useful? If so, what are their weaknesses and/or strengths?

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of the form. They also will become a matter of public record.
