SUPPLEMENTARY INFORMATION: In 1997, Congress mandated that the Service prepare a comprehensive conservation plan for each refuge within the National Wildlife Refuge System. Comprehensive conservation plans guide management decisions over the course of 15 years. They identify refuge goals and objectives as well as strategies for achieving those goals and objectives. Plans will be reviewed and updated at least every 15 years. Public input is the foundation of the planning process, and there were many opportunities for public involvement as plans were developed for Shiawassee, Wyandotte, and Rydell National Wildlife Refuges. The plans provide other agencies and the public with a clear understanding of the desired conditions of each Refuge and how the Service will implement management strategies.

Dated: February 21, 2002.
