SUPPLEMENTARY INFORMATION:

Title: Poultry and Pork Products From Mexico Transiting the United States.

OMB Number: 0579-0145.

Type of Request: Extension of approval of an information collection.

Abstract: The Animal and Plant Health Inspection Service (APHIS) of the United States Department of Agriculture is responsible for, among other things, regulating the importation into the United States of certain animals and animal products to prevent the introduction of communicable animal diseases (such as hog cholera or exotic Newcastle disease) into the United States.

The regulations under which we conduct these disease prevention activities are contained in title 9, chapter I, subchapter D, parts 91 through 99 of the Code of Federal Regulations. These regulations govern the importation of animals and animal products.

Under our regulations in 9 CFR 94.15, we allow fresh (chilled or frozen) pork and pork products from specified States in Mexico to transit the United States, under certain conditions, for export to another country. We also allow poultry carcasses, parts, and products (except eggs and egg products) from specified States in Mexico that are not eligible for

entry into the United States to transit the United States, via land ports, for immediate export.

We have determined that fresh pork and pork products, as well as poultry carcasses, parts, and products, from these Mexican States can transit the United States under the conditions set forth in the regulations with minimal risk of introducing hog cholera or exotic Newcastle disease.

Allowing fresh pork and pork products and poultry carcasses, parts, and products from certain Mexican States to transit the United States necessitates the use of several information collection activities, including the completion of an import permit application, the placement of serially numbered seals on product containers, and the forwarding of a pre-arrival notification to APHIS port personnel.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.77 hours per response.

Respondents: Exporters in Mexico and full-time, salaried veterinarians employed by Mexico's Federal Animal Health Protection Service.

Estimated annual number of respondents: 75.

Estimated annual number of responses per respondent: 10.

Estimated annual number of responses: 750.

Estimated total annual burden on respondents: 578 hours. (Due to averaging, the total annual burden hours

may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 22nd day of February 2002.

Acting Administrator, Animal and Plant Health Inspection Service.

SUPPLEMENTARY INFORMATION:

Title: Animal Welfare.

OMB Number: 0579-0115.

Type of Request: Extension of approval of an information collection.

Abstract: The Animal Welfare Act standards and regulations have been promulgated to promote and ensure the humane care and treatment of regulated animals. The regulations in 9 CFR part 3, subpart E, address specifications for the humane handling, care, treatment, and transportation of marine mammals. These specifications require facilities to keep certain records and provide certain information that are needed to enforce the Animal Welfare Act and the regulations.

The regulations (9 CFR part 3, subpart E) require facilities to complete many information collection activities, such as written protocols for cleaning, contingency plans, daily records of animal feeding, water quality records, documentation of facility-based employee training, plans for any animals kept in isolation, medical records, a description of the interactive program, and health certificates. These information collection activities do not mandate the use of any official government form and are necessary to enforce regulations intended to ensure the humane care and treatment of marine mammals.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our

information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.5952 hours per response.

Respondents: Employees or attendants of USDA licensed/registered marine mammal facilities.

Estimated annual number of respondents: 3,170.

Estimated annual number of responses per respondent: 8.6208.

Estimated annual number of responses: 27,328.

Estimated total annual burden on respondents: 16,265 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.
