Description: The Black Lung Benefits Act of 1977, as amended, 30 U.S.C. 901 et seq., provides for the payment of benefits to coal miners who have contracted black lung disease as a result of coal mine employment, and their dependents and survivors. Once a miner has been identified as having performed non-coal mine work subsequent to coal mine employment, the miner or the miner's survivor is asked to complete Form CM-913 to compare coal mine work to non-coal mine work. This employment, along with medical information, is used to establish whether the miner is totally disabled due to black lung disease caused by coal mine employment. Form CM-918 is an affidavit used to gather coal mine employment evidence only when primary evidence, such as pay stubs, W-2 forms, employer and union records, and Social Security records are unavailable or incomplete. Form CM-1093 is an affidavit form for recording lay medical evidence, used in survivor's claims in which evidence of the miner's medical condition is insufficient. For each of these forms (CM-913, CM-918, and CM-1093), the information is collected only if needed at the time the claim is received. If the information were not collected on these forms, the determination as to eligibility for benefits under the Black Lung Benefits Act would be severely limited.
