

approval of each new or revised recovery plan. Substantive technical comments may result in changes to the plan. Substantive comments regarding recovery plan implementation may not necessarily result in changes to the recovery plan, but will be forwarded to appropriate Federal or other entities so that they can take these comments into account during the course of implementing recovery actions. Individual responses to comments will not be provided.

San Francisco lessingia and Raven's manzanita are restricted to the San Francisco peninsula in San Francisco County, California. San Francisco lessingia, an annual herb in the aster family, is restricted to coastal sand deposits. Raven's manzanita is a rare evergreen creeping shrub in the heath family which was historically restricted to few scattered serpentine outcrops. Habitat loss, adverse alteration of ecological processes, and invasion of non-native plant species threaten San Francisco lessingia. Raven's manzanita has also been threatened by habitat loss; primary current threats include invasion of non-native vegetation and fungal pathogens. The draft plan also makes reference to several other federally listed species which are ecologically associated with San Francisco lessingia and Raven's manzanita, but which are treated comprehensively in other recovery plans. These species are beach layia (*Layia carnosa*), Presidio clarkia (*Clarkia franciscana*), Marin dwarf-flax (*Hesperolinon congestum*), Myrtle's silverspot butterfly (*Speyere zerene myrtleae*), and bay checkerspot butterfly (*Euphydryas editha bayensis*). In addition, 16 plant species of concern and 17 plant species of local or regional conservation significance are considered in this recovery plan.

The draft recovery plan stresses re-establishing dynamic, persistent populations of San Francisco lessingia and Raven's manzanita within plant communities which have been restored to be as "self-sustaining" as possible within urban wildland reserves. Specific recovery actions for San Francisco lessingia focus on the restoration and management of large, dynamic mosaics of coastal dune areas supporting shifting populations within the species' narrow historic range. Recovery of Raven's manzanita may include, but may not be limited to, the strategy of the 1984 Raven's Manzanita Recovery Plan, which emphasized the stabilization of the single remaining genetic individual. The draft plan also recommends re-establishing multiple sexually reproducing populations of Raven's manzanita in association with

its historically associated species of local serpentine outcrops. The objectives of this recovery plan are to delist San Francisco lessingia and to downlist Raven's manzanita through implementation of a variety of recovery measures including (1) Protection and restoration of a series of ecological reserves (often with mixed recreational and conservation park land uses); (2) promotion of population increases of San Francisco lessingia and Raven's manzanita within these sites, or reintroduction of them to restored sites; (3) management of protected sites, especially the extensive eradication or suppression of invasive dominant non-native vegetation; (4) research; and (5) public participation, outreach and education.

#### Public Comments Solicited

The Service solicits written comments on the recovery plan described. All comments received by the date specified above will be considered prior to approval of this plan.

**Authority:** The authority for this action is section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Dated: March 4, 2002.

##### Notice of Meeting of the Klamath River Basin Fisheries Task Force

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice of meeting.

**SUMMARY:** Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. App. I), this notice announces a meeting of the Klamath River Basin Fisheries Task Force, established under the authority of the Klamath River Basin Fishery Resources Restoration Act (16 U.S.C. 460ss *et seq.*). The meeting is open to the public. The purpose of the meeting is to continue providing recommendations from the affected interests to the Department of the Interior on implementation of their program to restore anadromous fisheries, including salmon and steelhead, of the Klamath River in California and Oregon.

**DATES:** The Klamath River Basin Fisheries Task Force (Task Force) will meet from 9 a.m. to 5 p.m. on June 19,

2002, and from 8 a.m. to 5 p.m. on June 20, 2002.

**ADDRESSES:** The meeting will be held at the Yurok Tribal office, Highway 96, Weitchpec, CA.

**FOR FURTHER INFORMATION CONTACT:** Phil Detrich, Project Leader, U.S. Fish and Wildlife Service, 1829 South Oregon Street, Yreka, California 96097, telephone (530) 842-5763.

**SUPPLEMENTARY INFORMATION:** For background information on the Task Force, please refer to the notice of their initial meeting that appeared in the **Federal Register** on July 8, 1987 (52 FR 25639).

Dated: March 4, 2002.

**John Engbring,**

Acting Manager, California/Nevada  
Operations Office, Sacramento, California.
