

will turn to the northwest on an existing Georgia Power Company 115 kV transmission line right-of-way for approximately 5 miles. The existing 115 kV transmission line will be reconstructed as an underbuild of the 230 kV transmission line. (The 230 kV and 115 kV transmission lines would share the same transmission line support structures.) The existing right-of-way will not need to be widened. The transmission line would then turn to the southwest on a new right-of-way along Peachtree Industrial Boulevard for approximately 1.6 miles to the Shoal Creek Substation to be located in Gwinnett County southwest of the intersection of Tuggle Greer Road and Peachtree Industrial Boulevard. (Georgia Power Company will construct the Shoal Creek Substation.) The new right-of-way will be forty (40) feet in width. This portion of the transmission line will also be underbuilt with a 115 kV transmission line. Both the 230 kV and the 115 kV transmission lines will connect to the Shoal Creek Substation. The portion of the 230 kV transmission line to parallel the 500 kV transmission line will be supported by single pole concrete structures. The 230 kV portion of the transmission line to be underbuilt with the 115 kV transmission line will be supported by single pole steel or concrete structures. It is anticipated that the transmission lines will be completed and energized by May 2003.
