Background

On February 13, 2002, the Department published the final results of the administrative review of the antidumping duty order on stainless steel wire rod from the Republic of Korea. See Final Results.

On February 12, 2002, we received a timely allegation from Changwon

Specialty Steel Co., Ltd. (Changwon) and Dongbang Special Steel Co., Ltd. (Dongbang) (collectively, respondents) that the Department made a ministerial error in the final results of review. The petitioner did not submit any comments in reply to this ministerial error allegation.

Scope of Review

For purposes of this review, SSWR comprises products that are hot-rolled or hot-rolled annealed and/or pickled and/or descaled rounds, squares, octagons, hexagons or other shapes, in coils, that may also be coated with a lubricant containing copper, lime or oxalate. SSWR is made of alloy steels containing, by weight, 1.2 percent or less of carbon and 10.5 percent or more of chromium, with or without other elements. These products are manufactured only by hot-rolling or hot-rolling annealing, and/or pickling and/or descaling, are normally sold in coiled form, and are of solid cross-section. The majority of SSWR sold in the United States is round in cross-sectional shape, annealed and pickled, and later cold-finished into stainless steel wire or small-diameter bar. The most common size for such products is 5.5 millimeters or 0.217 inches in diameter, which represents the smallest size that normally is produced on a rolling mill and is the size that most wire-drawing machines are set up to draw. The range of SSWR sizes normally sold in the United States is between 0.20 inches and 1.312 inches in diameter.

Two stainless steel grades are excluded from the scope of the review. SF20T and K-M35FL are excluded. The chemical makeup for the excluded grades is as follows:

SF20T.			
Carbon	0.05 max	Chromium	19.00/21.00
Manganese	2.00 max	Molybdenum	1.50/2.50
Phosphorous	0.05 max	Lead-added	(0.10/0.30)
Sulfur	0.15 max	Tellurium-added	(0.03 min)
Silicon	1.00 max		
K-M35FL.			
Carbon	0.015 max	Nickel	0.30 max
Silicon	0.70/1.00	Chromium	12.50/14.00
Manganese	0.40 max	Lead	0.10/0.30
Phosphorous	0.04 max	Aluminum	0.20/0.35
Sulfur	0.03 max		

The products subject to this review are currently classifiable under subheadings 7221.00.0005, 7221.00.0015, 7221.00.0030, 7221.00.0045, and 7221.00.0075 of the Harmonized Tariff Schedule of the

United States (HTSUS). Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of this review is dispositive.

Amendment of Final Results

The respondents contend that in the Final Results, and accompanying Decision Memo at Comment 8, the Department agreed with the respondents' argument that the
