

Department should replace the variable costs of manufacturing (VCOMs) and total costs of manufacturing (TCOMs) based on semiannual costs that are reported on the sales databases with the VCOMs and TCOMs based on annual costs that are reported on the cost database. The respondents allege that the Department correctly implemented this change for the VCOMs and TCOMs reported on the U.S. sales database, but erred by failing to make the same adjustment to the VCOMs reported on the home market sales database.

After reviewing our calculations, we found that we inadvertently failed to make this adjustment to the VCOMs reported on the home market sales database, and have determined that this error constitutes a ministerial error as defined by 19 CFR 351.224(f). We have corrected this error in accordance with 19 CFR 351.224(e) by adopting the respondents' suggested programming language. For further details, see Calculation Memorandum dated March 4, 2002.

Amended Final Results

As a result of our review and the correction of the ministerial error described above, we have determined that the margin for the collapsed entity Pohang Iron and Steel Co., Ltd. (POSCO)/Changwon/Dongbang is 5.61 percent.

Assessment

The Department shall determine, and the U.S. Customs Service shall assess, antidumping duties on all appropriate entries. The Department will issue appraisement instructions directly to the Customs Service. In accordance with 19 CFR 351.212(b)(1), we have calculated importer-specific assessment rates in the manner described in the Final Results, 67 FR at 6687.

Cash Deposit Requirements

We are issuing and publishing this amendment to the final results in accordance with section 751(h) of the Act.
