

Administrator of the Office of Information and Regulatory Affairs of the Office of Management and Budget, that the removal of this policy statement is not a major rule within the meaning of section 351 of the Small Business Regulatory Enforcement Fairness Act of 1996.¹⁰ The Commission is submitting this final rule to both houses of Congress and to the Comptroller General.

V. Environmental Analysis

Commission regulations describe the circumstances where preparation of an environmental assessment or an environmental impact statement will be required.¹¹ The Commission has categorically excluded certain actions from this requirement as not having a significant effect on the human environment.¹² Since removing an outdated policy statement from the regulations falls within categorical exclusions in the Commission's regulations for rules that are clarifying, corrective, or procedural, no environmental assessment or environmental impact statement is necessary.¹³

VI. Regulatory Flexibility Impact Statement

The Regulatory Flexibility Act of 1980 (RFA)¹⁴ generally requires a description and analysis of proposed rules that will, if promulgated, have a significant economic impact on a substantial number of small entities. The Commission is not required to make such analysis if a rule would not have such an effect.¹⁵

The Commission does not believe that the removal of § 2.65 from its regulations would have such an impact on small entities. The removal would have an impact only on interstate pipelines, which generally do not fall within the RFA's definition of small entity.¹⁶ Accordingly, pursuant to section 605(b) of the RFA, the Commission certifies that the removal of § 2.65 will not have a significant economic impact on a substantial number of small entities.

VII. Information Collection Statement

The Office of Management and Budget's (OMB) regulations require that OMB approve certain information collection requirements imposed by agency rules.¹⁷ However, this Final Rule contains no information reporting requirements, and therefore is not subject to OMB approval.
