National Vaccine Advisory Committee/ Vaccine Supply Conference Call

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), the Centers for Disease Control and Prevention (CDC) announces the following Federal Advisory Committee meeting.

Name: National Vaccine Advisory Committee (NVAC) Vaccine Supply Conference Call.

Time and Date: 11 a.m.-1 p.m., April 1, 2002.

Place: Audio Conference Call.

Status: This meeting is open to the public, telephone lines are limited. The public can join the meeting by Audio Conference Call by calling (888) 398-1687 and providing the following information:

Pass code: Peter.

Leaders Name: Dr. Georges Peter.

Purpose: This committee advises and makes recommendations to the Director of the National Vaccine Program on matters related to the Program responsibilities.

Matters To Be Discussed: To discuss recommendations from the NVAC Workshop on Strengthening the Vaccine Supply.

Agenda items are subject to change as priorities dictate.

Public comments will be permitted at the end of the NVAC meeting on April 1, 2002.

Contact Person for More Information:

Gloria Sagar, Committee Management Specialist, NVPO, CDC, 4770 Buford Highway, M/S K-77, Atlanta, Georgia 30341, telephone (770)488-2040.

The Director, Management Analysis and Services Office, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Proposed Criteria for Selecting New Environmental Chemicals or Categories of Chemicals for Analytic Development and for Inclusion in Future Releases of the National Report on Human Exposure to Environmental Chemicals

AGENCY: Centers for Disease Control and Prevention (CDC), Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: Requests public comment on CDC's proposed criteria for selecting new environmental chemicals or categories of chemicals for analytical method development and for selecting additional environmental chemicals or categories of chemicals to appear in future releases of the "National Report on Human Exposure to Environmental Chemicals" (the "Report"). The proposed criteria for choosing new environmental chemicals or categories of chemicals for analytic development and for including chemicals or categories of chemicals in future editions of the "Report" are as follows: (1) Independent scientific data which suggest that the potential for exposure of the U.S. population to a particular chemical is changing or persisting; (2) seriousness of health effects known or suspected to result from exposure to the chemical (for example, cancer and birth defects); (3) the proportion of the U.S. population likely to be exposed to levels of chemicals of known or potential health significance; (4) the need to assess the efficacy of public health actions to reduce exposure to a chemical in the U.S. population or a large component of the U.S. population (for

example, in children); (5) the existence of an analytic method that can measure the chemical or its metabolite in blood or urine with adequate accuracy, precision, sensitivity, specificity, and speed; and (6) the incremental analytical cost (in dollars and personnel) to perform the analyses (preference is given to chemicals that can be added readily to existing analytical methods). After reviewing and incorporating public comments from this announcement, CDC will publish the criteria in their final form in the **Federal Register** along with a general notice requesting public nominations of new chemicals that satisfy the new criteria. The criteria will be used by experts to prioritize the nominated chemicals for analytical method development and for eventual inclusion in the "Report."

DATES: Submit comments on or before April 19, 2002.

ADDRESSES: Address all comments concerning this notice to Dorothy Sussman, Centers for Disease Control and Prevention, National Center for Environmental Health, Division of Laboratory Sciences, Mail Stop F-20, 4770 Buford Highway, Atlanta, Georgia 30341.

FOR FURTHER INFORMATION CONTACT: Technical Information: Dr. Richard Wang, Telephone 770-488-7950

SUPPLEMENTARY INFORMATION: The "Report" provides an ongoing assessment of the exposure of the U.S. population to environmental chemicals using biomonitoring. (The "Report" is published by CDC under the authorities 42 U.S.C. 241 and 42 U.S.C. 242k). For the "Report," an environmental chemical means a chemical compound or chemical element present in air, water, soil, dust, food, or other environmental media. Biomonitoring is the assessment of human exposure to chemicals by measuring the chemicals or their breakdown products in human specimens, such as blood or urine. The "Report" provides this exposure information about participants in an ongoing national survey known as the National Health and Nutrition Examination Survey (NHANES). This
