II. Background

A. What Action is the Agency Taking?

EPA is making available risk assessments that have been developed as part of the Agency's public participation process for making reregistration eligibility and tolerance reassessment decisions for the organophosphate and other pesticides consistent with FFDCA, as amended by FQPA. The Agency's risk assessment and other related documents for Ziram are available in the individual pesticide docket. As additional comments, reviews, and risk assessment modifications become available, these will also be docketed for Ziram.

The Agency cautions that the Ziram risk assessment is preliminary and that further refinements may be appropriate. Risk assessment documents reflect only the work and analysis conducted as of the time they were produced and it is appropriate that, as new information becomes available and/or additional analyses are performed, the conclusions they contain may change.

EPA is providing an opportunity, through this notice, for interested parties to provide written comments and input to the Agency on the risk assessment for the pesticide specified in this notice. Such comments and input could address, for example, the availability of additional data to further refine the risk assessments, such as percent crop treated information or submission of residue data from food

processing studies, or could address the Agency's risk assessment methodologies and assumptions as applied to this specific chemical. Comments should be limited to issues raised within the risk assessment and associated documents. All comments should be submitted by May 28, 2002 using the methods in Unit I. of the **SUPPLEMENTARY INFORMATION**. Comments will become part of the Agency record for Ziram.
