Background

The FAA is developing a new Advisory Circular, AC 20-131B, Airworthiness Approval of Traffic Alert and Collision Avoidance Systems (TCAS II) and Mode S Transponders. This advisory circular (AC) provides guidance material for the airworthiness approval of Traffic Alert and Collision Avoidance systems (TCAS II) and Mode

transponders. This revision to the current AC is prompted by the development of TCAS II version 7 and the publication of Technical Standard Order (TSO) C-119b, Traffic Alert and Collision Avoidance system (TCAS) Airborne Equipment, TCAS II, dated 18 December, 1998. At this time, there is no plan to mandate an upgrade of existing TCAS II units to version 7. TCAS II version 7 was developed to be interoperable with existing TCAS II version v6.04a equipment. Version 7 includes numerous software changes improving surveillance performance and providing other improved capabilities such as in multiple aircraft encounters. This AC also proposes a reduction or elimination of flight test requirements under certain conditions when upgrading existing TCAS II units.

How To Obtain Copies

A copy of the revised draft AC may be obtained via Internet, (<http://www.faa.gov/avr/air/airhome.htm>), or on request from the individual listed under **FOR FURTHER INFORMATION CONTACT**.

Issued in Washington, DC, on March 14, 2002.
