

The Infrastructure project would include construction of a major north-south arterial north of Yosemite Road, portions of two additional minor arterial roadways and collector streets, and utility lines (storm drainage, sewer, potable water, fire and irrigation water, telecommunications, electric and gas) within the rights-of-way secured for those roadways. A storm water collection system would be constructed parallel to the major arterial roadway.

Although this infrastructure is needed for the campus, it is proposed to be located and configured in such a manner as to allow the development of a campus community adjacent to the campus.

The infrastructure would directly impact over 6 acres of waters of the United States. Indirect impacts have not yet been quantified. This project is located north of Yosemite Road, and parallel to Lake Road, northeast of the City of Merced, Merced County, California.

No alternatives to the infrastructure have been identified to date. However, the proposed infrastructure, alternatives to its proposed size, design and location will be considered in the Section 404(b)(1) analysis that will be prepared for this application.

The Corps' public involvement program includes several opportunities to provide oral and written comments. Affected Federal, state, local agencies, Indian tribes and other interested private organizations and parties are invited to participate. Significant issues to be analyzed in depth in the DEIS include, loss of waters of the United States, including vernal pools and other wetlands; cultural resources; threatened and endangered species; surface water and groundwater; water quality; socio-economic effects; aesthetics. The DEIS for both the Infrastructure and the UC Merced projects will be combined into one document to facilitate public review and analysis.

The Corps has initiated formal consultation with the U.S. Fish and Wildlife Service under Section 7 of the Endangered Species Act for eight, Federally threatened and endangered species and one species proposed for listing that may be affected by this project. In addition, the Corps will be consulting with the State Historic Preservation Officer under Section 106 of the National Historic Preservation Act regarding potential impacts to sites listed, or eligible for listing, on the National Register of Historic Places.

Two scoping meetings will be held on April 18, 2002, at the Merced Civic Center. The first meeting will be held

from 3:00p.m. to 5:00p.m., with the second from 7:00p.m. to 9:00p.m.

The estimated date when the DEIS will be made available to the public is Fall 2002.
