k. *Description of Request:* Olsen Power Partners (licensee) proposes to study, over a five-year period, the minimum flow released into the project's bypass reach and its effect on fishery resources. The current license requirement states that the licensee shall discharge from the project diversion, a continuous minimum flow of 30 cubic feet per second (cfs), or inflow to the project, whichever is less, for the protection of fish and wildlife resources in Old Cow Creek. The licensee stated that it believes the required minimum flow is set too high exceeding any necessary protection for the fishery and needlessly constraining generation. The licensee would like to reduce the minimum flow from 16 cfs during the first year of the study to 10 cfs for the next two years, followed by 5 cfs for the last two years of the study. The licensee indicated that at any time during the five year study, if and when impacts are detected, the continuation of the testing would be re-evaluated and a long term release flow recommendation developed.

l. *Locations of the Application:* A copy of the application is available for inspection and reproduction at the Commission's Public Reference Room, located at 888 First Street, NE., Room 2A, Washington, DC 20426, or by calling (202) 208-1371.
