foreign-sourced components comprise up to 60 percent of the finished product's value, and may include: transmission fluid; plastic and rubber articles; stainless steel wire; tubes, pipes or hollow profiles; tube or pipe fittings; screws, bolts, nuts, rivets, washers, and similar items; springs; retainers and clips; plugs and sealing rings; brackets and support plates; pumps; valves and similar articles; bearings; transmission shafts; gaskets; magnets; sensors; clutches and clutch parts; and various other motor vehicle parts (classifiable under HTS heading 8708.99). Duty rates on these categories of items range up to 9.9% ad valorem.

FTZ procedures would exempt ZF Batavia from Customs duty payments on the foreign components used in export activity. On its domestic sales, the company would be able to choose the duty rate that applies to finished automatic transmissions and assemblies (duty free to 2.5%) for foreign components, such as those noted above. The company would also be exempt from duty payments on foreign merchandise that becomes scrap/waste. The application indicates that the savings would help improve the facility's international competitiveness.

In accordance with the Board's regulations, a member of the FTZ Staff has been designated examiner to investigate the application and report to the Board.

Public comment is invited from interested parties. Submissions (original and 3 copies) shall be addressed to the Board's Executive Secretary at one of the following addresses:
