NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Records Schedules; Availability and Request for Comments

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice of availability of proposed records schedules; request for comments.

SUMMARY: The National Archives and Records Administration (NARA) publishes notice at least once monthly of certain Federal agency requests for records disposition authority (records schedules). Once approved by NARA, records schedules provide mandatory instructions on what happens to records when no longer needed for current Government business. They authorize the preservation of records of continuing value in the National Archives of the United States and the destruction, after a specified period, of records lacking administrative, legal, research, or other value. Notice is published for records schedules in which agencies propose to destroy records not previously authorized for disposal or reduce the retention period of records already authorized for disposal. NARA invites public comments on such records schedules, as required by 44 U.S.C. 3303a(a).

DATES: Requests for copies must be received in writing on or before May 20, 2002. Once the appraisal of the records is completed, NARA will send a copy of the schedule. NARA staff usually prepare appraisal memorandums that contain additional information concerning the records covered by a proposed schedule. These, too, may be requested and will be provided once the appraisal is completed. Requesters will be given 30 days to submit comments.

ADDRESSES: To request a copy of any records schedule identified in this

notice, write to the Life Cycle Management Division (NWML), National Archives and Records Administration (NARA), 8601 Adelphi Road, College Park, MD 20740-6001. Requests also may be transmitted by FAX to 301-713-6852 or by e-mail to records.mgt@nara.gov. Requesters must cite the control number, which appears in parentheses after the name of the agency which submitted the schedule, and must provide a mailing address. Those who desire appraisal reports should so indicate in their request.

FOR FURTHER INFORMATION CONTACT:

Marie Allen, Director, Life Cycle Management Division (NWML), National Archives and Records Administration, 8601 Adelphi Road, College Park, MD 20740-6001. Telephone: (301) 713-7110. E-mail: records.mgt@nara.gov.

SUPPLEMENTARY INFORMATION: Each year Federal agencies create billions of records on paper, film, magnetic tape, and other media. To control this accumulation, agency records managers prepare schedules proposing retention periods for records and submit these schedules for NARA's approval, using the Standard Form (SF) 115, Request for Records Disposition Authority. These schedules provide for the timely transfer into the National Archives of historically valuable records and authorize the disposal of all other records after the agency no longer needs them to conduct its business. Some schedules are comprehensive and cover all the records of an agency or one of its major subdivisions. Most schedules, however, cover records of only one office or program or a few series of records. Many of these update previously approved schedules, and some include records proposed as permanent.

No Federal records are authorized for destruction without the approval of the Archivist of the United States. This approval is granted only after a thorough consideration of their administrative use by the agency of origin, the rights of the Government and of private persons directly affected by the Government's activities, and whether or not they have historical or other value.

Besides identifying the Federal agencies and any subdivisions requesting disposition authority, this public notice lists the organizational unit(s) accumulating the records or indicates agency-wide applicability in the case of schedules that cover records that may be accumulated throughout an agency. This notice provides the control number assigned to each schedule, the

total number of schedule items, and the number of temporary items (the records proposed for destruction). It also includes a brief description of the temporary records. The records schedule itself contains a full description of the records at the file unit level as well as their disposition. If NARA staff has prepared an appraisal memorandum for the schedule, it too includes information about the records. Further information about the disposition process is available on request.

Schedules Pending

1. Department of the Air Force, Agency-wide (N1-AFU-02-3, 81 items, 81 temporary items). Electronic versions of temporary records relating to supply and transportation matters. BILLING CODE 7515-01-P

NUCLEAR REGULATORY COMMISSION

**[Docket No. 40-3392, License No. SUB-526,
EA 02-025]**

Honeywell International, Inc., Metropolis Works Facility, Metropolis, Illinois; Order Modifying License; (Effective Immediately)

I

Honeywell International, Inc. ("Honeywell" or the "licensee") holds Materials License No. SUB-526, issued by the U.S. Nuclear Regulatory Commission (NRC or Commission) authorizing the licensee to receive, acquire, possess and transfer byproduct and source material in accordance with the Atomic Energy Act of 1954 and 10 CFR parts 30 and 40. Commission regulations at 10 CFR 20.1801, require the licensee to secure licensed material from unauthorized removal or access from controlled or unrestricted areas. Further, License Condition 10 of Materials License No. SUB-526, as amended, requires that the licensee implement and maintain specific measures to control public and private access to the facility as described in the October 1, 1998 enclosure to its application dated September 23, 1998.

II

On September 11, 2001, terrorists simultaneously attacked targets in New York, NY, and Washington, DC, utilizing large commercial aircraft as weapons. In response to the attacks and intelligence information subsequently obtained, the Commission issued a number of Safeguards and Threat Advisories to its licensees in order to strengthen licensees' capabilities and readiness to respond to a potential attack on a nuclear facility. The Commission has also communicated with other Federal, State and local government agencies and industry representatives to discuss and evaluate the current threat environment in order to assess the adequacy of security measures at licensed facilities. In addition, the Commission has commenced a comprehensive review of its safeguards and security programs and requirements.

As a result of its initial consideration of current safeguards and security plan requirements, as well as a review of information provided by the intelligence community, the Commission issued a Confirmatory Action Letter, No. RIII-01-005, dated December 21, 2001, to Honeywell, confirming the Licensee's agreement to immediately implement enhanced security measures and review

longer term security enhancements to the site. The Commission has now determined that certain compensatory measures should be required to be implemented by the licensee as prudent, interim measures to address the current threat. Therefore, the Commission is imposing interim requirements, set forth in Attachment 1¹ of this Order, which supplement existing regulatory requirements, to provide the Commission with reasonable assurance that the public health and safety and common defense and security continue to be adequately protected in the current threat environment. This order supercedes the Confirmatory Action Letter of December 21, 2001. These requirements will remain in effect pending notification from the Commission that a significant change in the threat environment occurs, or until the Commission determines that other changes are needed following a comprehensive re-evaluation of current safeguards and security programs.

The Commission recognizes that some of the requirements set forth in Attachment 1² to this Order may already have been initiated by Honeywell in response to previously issued advisories, Confirmatory Action Letter No. RIII-01-005, or on its own. It is also recognized that some measures may need to be tailored to specifically accommodate the specific circumstances and characteristics existing at the licensee's facility to achieve the intended objectives and avoid any unforeseen effect on safe operation. And, although the licensee's response to the Safeguards and Threat Advisories and the December 21, 2001 Confirmatory Action Letter has been adequate to provide reasonable assurance of adequate protection of public health and safety, the Commission believes that the response must be supplemented because the current threat environment has persisted longer than expected and as a result, it is appropriate to require certain security measures so that they are maintained within the established regulatory framework. Thus, in order to provide assurance that the licensee is implementing prudent measures to achieve a consistent level of protection to address the current threat environment, Materials License No.

¹ Attachment 1 contains SAFEGUARDS information and will not be released to the public.

² To the extent that specific measures identified in Attachment 1 to this Order require actions pertaining to the Licensee's possession and use of chemicals, such actions are being directed on the basis of the potential impact of such chemicals on radioactive materials and activities subject to NRC regulation.
