

II. Abandonment of Historic Natural Gas Pipelines

Abandonment of a historic natural gas pipeline, in part or in whole, will qualify for the exemption under Section I, provided that the Federal agency or its applicant has documented the historic natural gas pipeline by:

(a) Completing a determination of eligibility for the pipeline as a whole, which identifies contributing and non-contributing components of the pipeline, using standard information required on a National Register nomination form. The documentation must be prepared by an individual meeting the Secretary of the Interior's *Professional Qualification Standards* (48 FR 44738-9). The documentation must include the following components:

(i) a brief history of construction of the line with a bibliography recording the primary and secondary sources that were used;

(ii) documentation through as-built drawings, historical photographs or, 35 mm photographs, as appropriate, of representative examples of significant features associated with the line;

(iii) a map of the historic property set at an appropriate scale; and

(iv) an annotated bibliography of other primary and secondary sources identified during research; and

(b) Placing the documentation in an appropriate repository, accessible to the general public, in each State crossed by the pipeline, and filing the documentation with the relevant State Historic Preservation Officer(s).

When the abandonment involved only a section of the historic natural gas pipeline, Federal agencies or applicants handling subsequent abandonments of other sections of the historic natural gas pipeline will not have to repeat the documentation requirements set forth above.

III. Existing Agreements

This exemption is not intended to amend, invalidate or otherwise modify Section 106 Programmatic Agreements (PAs) in existence at the time this exemption goes into effect. Parties to such PAs may amend them according to their terms.

Rural Utilities Service

Golden Valley Electric Association, Inc.; Notice of Intent

AGENCY: Rural Utilities Service, USDA.

ACTION: Notice of intent to hold scoping meeting and prepare an environmental assessment and/or an environmental impact statement.

SUMMARY: Notice is hereby given that the Rural Utilities Service (RUS), pursuant to the National Environmental Policy Act (NEPA) of 1969 (42 U.S.C. 4321 *et seq.*), the Council on Environmental Quality (CEQ) Regulations for implementing NEPA (40 CFR parts 1500–1508), and RUS Environmental Policies and Procedures (7 CFR part 1794) proposes to hold a scoping meeting and prepare an Environmental Assessment (EA) for its Federal action related to a project proposed by Golden Valley Electric Association, Inc., (GVEA) of Fairbanks, Alaska. The project consists of constructing a 138kV transmission line between the GVEA generating facilities at the Williams Alaska Petroleum Refinery in North Pole, Alaska, and the Carney Substation, which is approximately 28 miles southeast of North Pole.

Meeting Information: RUS will conduct a scoping meeting in open house forum on Thursday, April 25, 2002, at the North Pole City Hall, 125 Snowman Lane, North Pole, Alaska 99705, from 5 p.m. until 9 p.m.

FOR FURTHER INFORMATION CONTACT: Nurul Islam, Environmental Protection Specialist, U.S. Department of Agriculture, RUS, Engineering and Environmental Staff, 1400 Independence Avenue, SW, Washington, DC 20250–1571, telephone (202) 720–1414, FAX: (202) 720–0820, e-mail: nislam@rus.usda.gov. Information is also available from Mr. Greg Wyman, Manager of Construction Services, GVEA, POB 71249, Fairbanks, Alaska 99707–1249, telephone (907) 451–5629. His e-mail address is: gwymen@gvea.com.

SUPPLEMENTARY INFORMATION: GVEA proposes to construct the North Pole-Carney Substation 138kV Transmission Line Project, which is approximately 28 miles in length. To accommodate the new transmission line, either a new substation would be built next to the Williams Refinery, or the existing generating/substation facilities at North Pole would be modified to provide an additional breaker to feed the transmission line and other breaker bays for future growth. In addition, GVEA would modify the Carney Substation to provide an additional breaker to allow for termination of the transmission line. This substation work would take place within the existing substation footprint. The primary purpose of the facility is to meet the projected future increases in regional power requirements and to improve the quality of service to existing customers.

Alternatives to be considered by RUS and GVEA include no action, purchased power, upgrade of existing lines, new transmission facilities, alternative sites, alternative routes, energy conservation.

GVEA has prepared an Alternative Evaluations and Macro-Corridor Study for the project. The report is available for public review at RUS or GVEA at the addresses provided in this notice and at the following locations:

- (1) Noel Wien Public Library, 1215 Cowles Street, Fairbanks, AK 99701
- (2) North Pole City Library, 601 Snowman Lane, North Pole, AK 99705
- (3) GVEA Office, 758 Illinois Street, Fairbanks, AK 99707

Federal, state and local agencies, private organizations, and the public are invited to participate in the planning and analysis of the proposed project. Representatives from RUS and GVEA will be available at the scoping meeting to discuss RUS' environmental review process, the proposed project and the alternatives being considered, scope of the environmental issues to be considered, and answer questions. Oral and written comments will be accepted at the scoping meeting. Written comments regarding the proposed project will also be accepted for 30 days after the scoping meeting. All written comments should be sent to RUS at the address provided in this notice.

Any final action by RUS related to the proposed project will be subject to, and contingent upon, compliance with all relevant Federal environmental laws and regulations and completion of environmental review procedures as prescribed by the CEQ Regulations and RUS Environmental Policies and Procedures.

Dated: March 29, 2002.

Mark S. Plank,

Acting Director, Engineering and Environmental Staff, Rural Utilities Service.
