Used Oil ICR Renewal

Affected entities: Entities potentially affected by this action are those which handle or manage used oil including used oil transporters, transfer facilities, processors, re-refiners, and off-specification burners.

Title: Used Oil Management Standards Recordkeeping and Reporting Requirements (OMB Control No. 2050-0124; EPA ICR No. 1286) expiring 06/30/2002.

Abstract: EPA is seeking public comment on the Used Oil Management Standards Recordkeeping and Reporting Requirements ICR (Used Oil ICR) prior to submitting it to OMB for renewal. The Used Oil Management Standards, which include information collection requests, were developed in accordance with Section 3014 of the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984 (HSWA), which directs EPA to “promulgate regulations * * * as may be necessary to protect public health and the environment from the hazards associated with recycled oil” and, at the same time, to not discourage used oil recycling. In 1985 and 1992, EPA established mandatory regulations that govern the management of used oil (see 40 CFR part 279). To document and ensure proper handling of used oil, these regulations establish notification, testing, tracking and recordkeeping requirements for used oil transporters, processors, re-refiners, marketers, and burners. They also set standards for the prevention and cleanup of releases to the environment during storage and transit, and for the safe closure of storage units and processing and refining facilities to mitigate future releases and damages.
