

time frame provided under section 751(a)(3)(A) of the Act. Completion of the preliminary results within this period is impracticable for the following reasons: (1) This is the first administrative review of this suspension agreement, raising a number of issues of first impression; (2) the agreement has been in force since October 1992, making a particularly enormous quantity of information subject to review; (3) the agreement has been amended four times, thereby complicating the analysis; and (4) analysis of the Russian uranium industry will be complicated due to the complexity of uranium transactions in Russia and the high degree of integration between Russia's nuclear power and uranium production entities, and government.

The Department is therefore extending the preliminary results due date by 120 additional days in accordance with section 751(a)(3)(A) of the Act. The new due date for the preliminary results is October 31, 2002.
