

access to a more nutritious diet, to improve the eating habits of the Nation's children, and to help America's farmers by providing an outlet for the distribution of food purchased under farmer assistance authorities.

These data will be used to monitor the prevalence of food security, food insecurity, and hunger among the Nation's households. The prevalence of these conditions as well as year-to-year trends in their prevalence will be estimated at the national level and for population subgroups. The data will also be used to monitor the amounts that households spend for food and their use of community food pantries and emergency kitchens. These statistics along with research based on the data will be used to identify the causes and consequences of food insecurity, and to assess the need for, and performance of, domestic food assistance programs. The data will also be used to improve the measurement of food security and to develop measures of additional aspects and dimensions of food security. This consistent measurement of the extent and severity of food insecurity will aid in policy decision making. The supplemental survey instrument was developed in conjunction with food security experts nationwide as well as survey method experts within the Census Bureau. This supplemental information will be collected by both personal visit and telephone interviews in conjunction with the regular monthly CPS interviewing. All interviews, whether by personal visit or by telephone, are conducted using computers.

### Submission for OMB Review: Comment Request

DOC has submitted to the Office of Management and Budget (OMB) for clearance of the following proposal for collection of information under the provisions of the Paperwork Reduction Act of 1995, Public Law 104-13.

#### International Trade Administration

*Title:* Application for an Export Trade Certificate of Review.

*Agency Form Number:* ITA-4093P.

*OMB Number:* 0625-0125.

*Type of Request:* Regular Submission.

*Burden:* 960 hours.

*Number of Respondents:* 30.

*Avg. Hours per Response:* 32 hours.

*Needs and Uses:* Title III of the Export Trading Company Act of 1982 (Pub.L.

97–290, 96 Stat. 1233–1247), requires the Department of Commerce to establish a program to evaluate applications for an Export Trade Certificate of Review (antitrust preclearance for joint export related activities), and with the concurrence of the Department of Justice, issue such certificates where the requirements of the Act are satisfied. The Act requires that Commerce and Justice conduct economic and legal antitrust analyses prior to the issuance of a certificate. The collection of information is necessary to conduct the required economic and legal antitrust analyses. Without the information, there could be no basis upon which a certificate could be issued.

In the Department of Commerce, the economic and legal analyses are performed by the Office of Export Trading Company Affairs and the Office of General Counsel, respectively. The Department of Justice analyses will be conducted by its Antitrust Division. The purpose of such analyses is to make a determination as to whether or not to issue an Export Trade Certificate of Review.

A certificate provides its holder and the members named in the certificate (a) immunity from government actions under state and Federal antitrust laws for the export conduct specified in the certificate; (b) some protection from frivolous private suits by limiting their liability in private actions from treble to actual damages when the challenged activities are covered by an Export Certificate of Review. Title III was enacted to reduce uncertainty regarding the application of U.S. antitrust laws to export activities—especially those involving actions by domestic competitors. Application for an export trade certificate of review is voluntary.

**Affected Public:** Business or other for-profit; not-for-profit institutions and State, local or Tribal Government.

**Frequency:** On occasion.

**Respondent's Obligation:** Required to obtain or retain a benefit, voluntary.

**OMB Desk Officer:** David Rostker, (202) 395–3897.

#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

The Monthly Wholesale Trade Survey provides the only continuous measure of monthly sales, end-of-month inventories, method of inventory valuation, and inventories/sales ratios in the United States by selected kinds of business for merchant wholesalers. The Bureau of Economic Analysis (BEA) uses this information to improve the inventory valuation adjustments applied to estimates of the Gross Domestic Product (GDP). The Bureau of Labor Statistics (BLS) uses the data as input to their Producer Price Indexes and in developing productivity measurements.

Estimates produced from the Monthly Wholesale Trade Survey are based on a

probability sample and are published on the North American Industry Classification System (NAICS) basis. The sample design consists of small, medium, and large cases requested to report sales and inventories each month. The sample, consisting of about 3,800 wholesale businesses, is drawn from the Business Register, which contains all Employer Identification Numbers (EINs) and listed establishment locations. The sample is updated quarterly to reflect employer business “births” and “deaths”; adding new employer businesses identified in the Business and Professional Classification Survey and deleting firms and EINs when it is determined they are no longer active.

The Monthly Wholesale Trade Survey will continue to generate its monthly report form through a print-on demand system. This system allows us to tailor the survey instrument to a specific industry. For example, it will print an additional instruction for a particular NAICS code. This system also reduces the time and cost of preparing mailout packages that contain unique variable data, while improving the look and quality of the products being produced.

We collect this information by mail, fax, and telephone follow-up.
