

River diversion from the Columbia River.

The alternative of electrification of the Chandler Pumping Plant would involve replacing the existing hydraulic pumps in the pumping plant with electric pumps to pump Yakima River water into KID's main canal at the current point of diversion. The Chandler Pumping Plant is located at the end of the Chandler Canal into which water is diverted at Prosser Dam. Replacing the hydraulic pumps with electric pumps would eliminate the need to divert water at Prosser Dam to drive the hydraulic pumps leaving up to 450 cfs in the 11 mile reach of the Yakima River from Prosser Dam to the Chandler Pumping Plant. No exchange with CID would take place under this alternative.

#### Public Involvement

Reclamation plans to conduct public scoping meetings to solicit input on the alternatives developed to address stream flows in the lower Yakima River between Prosser Dam and the mouth of the river, and impacts associated with those alternatives. Reclamation will summarize comments received during the scoping meetings and written comments received during the scoping period, identified under **DATES**, into a scoping summary document which will be made available to the public.
