[Docket No. CP01-415-000]

East Tennessee Natural Gas Company; Notice of Availability of the Draft Environmental Impact Statement for the Proposed Patriot Pipeline Project

April 26, 2002.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared a Draft Environmental Impact Statement (DEIS) on the natural gas pipeline facilities proposed by East Tennessee Natural Gas Company (East Tennessee) in the above-referenced docket.

The DEIS was prepared to satisfy the requirements of the National Environmental Policy Act (NEPA) and the Commission's implementing regulations under Title 18, Code of Federal Regulations (CFR), Part 380. The staff concludes that approval of the proposed project with the appropriate mitigating measures as recommended, would have limited adverse environmental impact. The DEIS also evaluates alternatives to the proposed Project, and requests comments on them.

The DEIS addresses the potential environmental effects of the construction and operation of the Patriot Project which consists of two components, the Mainline Expansion and the Patriot Extension.

Mainline Expansion

- Construct approximately 87.3 miles of pipeline loops, ranging in size from 20 to 24 inches in diameter;
- Uprate approximately 77.2 miles of pipeline;
- Abandon and re-lay approximately 22.5 miles of pipeline;
- Construct five new compressor stations; and
- Modify 10 existing compressor stations;

Patriot Extension

- Construct approximately 99.7 miles of new pipeline (24- and 16-inch-diameter);
- Three new meter stations; and
- Associated mainline valves and appurtenant facilities in Virginia and North Carolina.

The staff has also evaluated 12 major route alternatives. Nine of these were removed from further consideration. The remaining three major route alternatives appear to have environmental benefits relative to the

proposed route. We¹ are requesting public comment on these three major route alternatives. We analyzed seven route variations; five were removed from further consideration, and two are recommended over the proposed route. We examined four alternative compressor station sites; two were removed from consideration after our analyses and two are recommended over the proposed sites. We evaluated two alternative interconnect sites for the proposed Transco interconnect, both of which were removed from further consideration.

Comment Procedures and Public Meetings

Any person wishing to comment on the DEIS may do so. To ensure consideration prior to a Commission decision on the proposal, it is important that we receive your comments before the date specified below. - Mail your comments so that they will be received in Washington, DC on or before June 17, 2002.

Please note that we are continuing to experience delays in mail deliveries from the U.S. Postal Service. As a result, we will include all comments that we receive within a reasonable time frame in our environmental analysis of this project. However, the Commission encourages electronic filing of any comments or interventions or protests to this proceeding. Comments may also be filed electronically via the Internet in lieu of paper.
