

proposals that relate to exploration for and the development/production of oil and gas resources on the Gulf of Mexico OCS. The EA examines the potential environmental effects of activities described in the proposals and presents MMS conclusions regarding the significance of those effects. Environmental Assessments are used as a basis for determining whether or not approval of the proposals constitutes

major Federal actions that significantly affect the quality of the human environment in the sense of NEPA Section 102(2)(C). A FONSI is prepared in those instances where MMS finds that approval will not result in significant effects on the quality of the human environment. The FONSI briefly presents the basis for that finding and includes a summary or copy of the EA.

This notice constitutes the public notice of availability of environmental documents required under the NEPA Regulations.

This listing includes all proposals for which the Gulf of Mexico OCS Region prepared a FONSI since publication of the preceding notice on December 18, 2001.

The Commission will issue a final phase notice of scheduling, which will be published in the **Federal Register** as provided in section 207.21 of the Commission's rules, upon notice from the Department of Commerce of an affirmative preliminary determination in the investigation under section 733(b) of the Act, or, if the preliminary determination is negative, upon notice of an affirmative final determination in that investigation under section 735(a) of the Act. ### Background

On February 13, 2002, a petition was filed with the Commission and Commerce by the American Bearing Manufacturers Association, Washington, DC, alleging that an industry in the United States is materially injured and threatened with material injury by reason of LTFV imports of certain ball bearings and parts thereof from China. Accordingly, effective February 13, 2002, the Commission instituted antidumping duty investigation No. 731-TA-989 (Preliminary).

Notice of the institution of the Commission's investigation and of a public conference to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of February 21, 2002 (67 FR 8039). The conference was held

in Washington, DC, on March 6, 2002, and all persons who requested the opportunity were permitted to appear in person or by counsel. The Commission transmitted its determination in this investigation to the Secretary of Commerce on April 29, 2002. The views of the Commission are contained in USITC Publication 3504 (May 2002), entitled *Ball Bearings from China: Investigation No. 731-TA-989 (Preliminary)*.

Issued: April 30, 2002.

By order of the Commission.
