IV. What Action is EPA Taking in this Notice?

EPA is making available for public viewing the revised risk assessments and related documents for the triazine pesticide, atrazine. These documents have been developed as part of the public participation process that EPA and USDA are using to involve the public in the reassessment of pesticide tolerances under the Food Quality Protection Act (FQPA), and the reregistration of individual pesticides under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). A pilot public participation process was developed as part of the EPA and the USDA Tolerance Reassessment Advisory Committee (TRAC), which was established in April 1998, as a subcommittee under the auspices of EPA's National Advisory Council for Environmental Policy and Technology. A goal of the pilot public participation process has been to find a more effective way for the public to participate at critical junctures in the Agency's development pesticide risk assessments and risk management decisions. EPA and USDA began implementing this pilot process in August 1998, to increase transparency and opportunities for stakeholder consultation. The documents being released to the public through this notice provide information on the revisions that were made to the atrazine preliminary risk assessments, which were released to the public on February

14, 2001 (66 FR 10287) (FRL-6765-3) and September 26, 2001 (66 FR 49186) (FRL-7063-7), through notices in the **Federal Register**.

In addition, this notice starts a 60-day public participation period during which the public is encouraged to submit risk management proposals or other comments on risk management for atrazine. The Agency is providing an opportunity, through this notice, for interested parties to provide written comments on risk management proposals or ideas for atrazine. Such comments and proposals could address ideas about how to manage dietary, occupational, or ecological risks on specific atrazine use sites or crops across the United States or in a particular geographic region of the country. To address dietary risk, for example, commenters may choose to discuss the feasibility of lower application rates, increasing the time interval between application and harvest ("preharvest intervals"), modifications in use, or suggest alternative measures to reduce residues contributing to dietary exposure. For occupational risks, commenters may suggest personal protective equipment or technologies to reduce exposure to workers and pesticide handlers. For ecological risks, commenters may suggest ways to reduce environmental exposure, e.g., exposure to birds, fish, mammals, and other non-target organisms. All comments and proposals must be received by EPA on or before July 5, 2002. Comments and proposals will become part of the Agency record for the pesticide specified in this notice.

List of Subjects: Environmental protection, Chemicals, Pesticides and pests, Atrazine, Triazines.

Dated: April 19, 2002.
