SUPPLEMENTARY INFORMATION:

History

On Wednesday, January 16, 2002, the FAA proposed to amend 14 CFR part 71 to establish Class E airspace at Lake Geneva (67 FR 2148). The proposal was to establish controlled airspace extending upward from 700 feet above the surface of the earth to contain Instrument Flight Rules (IFR) operations in controlled airspace during portions of the terminal operation and while transiting between the enroute and terminal environments.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Class E airspace designations for airspace areas extending upward from 700 feet or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9J dated August 31, 2001, and effective September 16, 2001, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

The Rule

This amendment to 14 CFR part 71 establishes Class E airspace at Lake Geneva, WI, to accommodate aircraft executing instrument flight procedures into and out of Grand Geneva Resort Airport. The area will be depicted on appropriate aeronautical charts.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for part 71 continues to read as follows:

14 CFR Part 71

[Airspace Docket No. 01-AGL-14]

Modification of Class D Airspace; Columbus, OH

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action modifies Class D airspace at Columbus, OH. A cutout in the Bolton Field Class D airspace is currently in place between 060 degrees and 105 degrees, from a 1.30-mile radius of the airport. This cutout exists to

protect South Columbus Airport which has since been closed. This action reverts the airspace contained in the cutout back to Bolton Field Class D airspace.

EFFECTIVE DATE: 0901 UTC, June 13, 2002.

Modification of Class D Airspace; Mosinee, WI; Modification of Class E Airspace; Mosinee, WI

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action modifies Class D airspace at Mosinee, WI, and modifies Class E airspace at Mosinee, WI. Area Navigation (RNAV) Standard Instrument Approach Procedures (SIAP's) have been developed for Central Wisconsin Airport. Controlled airspace extending upward from the surface of the earth is needed to contain aircraft executing these approaches. This action increases the radius of the existing Class D and Class E airspace for Central Wisconsin Airport.
