SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-45895; File No. SR-Amex-2002-15]

Self-Regulatory Organizations; Order Granting Accelerated Approval of Proposed Rule Change by the American Stock Exchange LLC to Amend Commentary .02(c) of Amex Rule 901C to Include Volume Weighted Average Pricing as a Permissible Index Option Settlement Value Calculation Methodology

May 8, 2002.

I. Introduction

On March 5, 2002, the American Stock Exchange LLC ("Amex" or "Exchange") filed with the Securities and Exchange Commission ("Commission"), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")¹ and Rule 19b-4 thereunder,² a proposed rule change to amend Commentary .02(c) of Amex Rule 901C to add volume weighted average pricing ("VWAP") as a permissible index option settlement value calculation methodology for National Association of Securities Dealers Automated Quotation System ("NASDAQ") National Market System ("NMS") listed components. Notice of the proposed rule change was published for comment in the **Federal Register** on April 10, 2002.³ This order approves the proposed rule change on an accelerated basis.

II. Description of the Proposal

The Exchange proposes to amend Commentary .02(c) of Amex Rule 901C to add VWAP as a permissible index option settlement value calculation methodology for NASDAQ/NMS listed components. Currently, Commentary .02(c) of Amex Rule 901C provides that index settlement values are determined by using the regular way opening sale price for each of an index's component stocks in its primary market on the last

trading day prior to expiration.⁴ Unlike exchange-listed securities where there is a market opening price at which all investors entering a market-on-open order can participate, investors in NASDAQ/NMS securities cannot be sure of transactions at a price equal to the first reported print. In some instances, this price may be significantly different than the first price at which most investors can conduct transactions. As a result, investors, market-makers and the specialist cannot be sure that any hedges into which they may have entered will converge to the settlement value for the index; and, in some cases, the value of the hedge may differ significantly from the index settlement value. This uncertainty adds to the cost of trading the options and makes them less desirable to trade.

While it may still be difficult to get complete convergence, the Exchange believes that using the VWAP would provide more opportunity for investors to transact at a price near the settlement price, making it much less likely that there will be any significant difference between the hedge and the settlement value. For this reason, the Exchange proposes to permit, in addition to "regular way" opening price settlement, the VWAP settlement calculation methodology for NASDAQ/NMS listed components.

III. Discussion

The Commission has reviewed carefully the proposed rule change and finds that it is consistent with the Act and the rules and regulations promulgated thereunder applicable to a national securities exchange and, in particular, with the requirements of Section 6(b).⁵ Specifically, the Commission finds that approval of the proposed rule change is consistent with Section 6(b)(5)⁶ in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, and to remove impediments to and perfect the mechanism of a free and open market and a national market system, and in general, to protect investors and the
