Background

The Northwest Indian Fisheries Commission submitted a Tribal Plan in cooperation with the Puget Sound Indian Tribes for scientific research and assessment activities within the range of the Hood Canal summer-run chum salmon ESU in the state of Washington. The Puget Sound Indian Tribes conduct, independently and in cooperation with Federal and state agencies, a variety of research and assessment projects that provide the technical basis for their fishery management, and for the conservation and restoration of salmon stocks and their habitat. The need for improved and more quantitative information regarding freshwater and early marine survival needs of salmon is the purpose of the current research activities. The Tribal Plan includes implementation, monitoring, and evaluation procedures designed to ensure that the research activities are consistent with these objectives. The research activities described in the Tribal Plan span a 5 year period beginning on January 1, 2002.

Authority

Under section 4(d) of the ESA, the Secretary is required to adopt such regulations as he deems necessary and advisable for the conservation of the species listed as threatened. The ESA Tribal 4(d) rule (65 FR 42481, July 10, 2000) states that the ESA section 9 take prohibitions will not apply to Tribal Plans provided the Secretary determines that implementation of such Tribal Plan will not appreciably reduce the likelihood of survival and recovery of the listed salmonids.

Dated: May 10, 2002.

Wanda L. Cain,

Acting Director, Office of Protected Resources, National Marine Fisheries Service.
