This full text may be purchased from the Commission's duplicating contractor, Qualex International, Portals II, 445 12th Street, SW., Room CY-B402, Washington, DC 20554, telephone 202-863-2893, facsimile 202-863-2898, or via e-mail [qualexint@aol.com](mailto:qualexint@aol.com). ### Synopsis of the Order

**1. History of the Application.** On February 14, 2002, BellSouth filed a joint application, pursuant to section 271 of the Telecommunications Act of 1996, with the Commission to provide in-region, interLATA service in Georgia and Louisiana.

**2. The Georgia and Louisiana Public Service Commissions' Evaluations.** Both the Georgia Public Service Commission (Georgia Commission) and the Louisiana Public Service Commission (Louisiana Commission) advised the Commission, following an extensive review process, that BellSouth met the checklist requirements of section 271 and has taken the statutorily required steps to open its local markets to competition. Consequently, the Georgia Commission and the Louisiana Commission recommended that the Commission approve BellSouth's in-region, interLATA entry in its March 4, 2002

evaluation of the Georgia and Louisiana Application.

**3. The Department of Justice's Evaluation.** The Department of Justice filed its evaluation of BellSouth's Georgia/Louisiana Application on March 19, 2002. It recommended approval of the application subject to the Commission's review of improvements in BellSouth's operations support systems (OSS).

### Primary Issues in Dispute

**4. Checklist Item 2—Unbundled Network Elements.** Based on the record, the Commission finds that BellSouth has provided "nondiscriminatory access to network elements in accordance with the requirements of sections 251(c)(3) and 252(d)(1)" of the Act in compliance with checklist item 2.

5. The Commission finds that BellSouth UNE rates in Georgia and Louisiana are just, reasonable, and nondiscriminatory, and are based on cost plus a reasonable profit as required by section 252(d)(1). Thus, BellSouth UNE rates in Georgia and Louisiana satisfy checklist item 2. Because the Commission has not previously approved a section 271 application of BellSouth, it conducts a stand-alone analysis of BellSouth's rates, in which it reviews the rates from the "bottom up" to ensure they comply with our TELRIC standards rather than engaging in any benchmarking or other state comparisons. The Commission has previously noted that different states may reach different results that are each within the range of what a reasonable application of TELRIC would produce. After reviewing commenters' criticism of loop rate issues (including use of Universal Digital Loop Carrier and Integrated Digital Loop Carrier, loading factors and fill factors), switching rate issues and Daily Usage File (DUF) rates, the Commission concludes that the Georgia and Louisiana Commissions followed basic TELRIC principles and there is insufficient evidence to demonstrate that the state commissions committed clear error.

6. The Commission also concludes that BellSouth meets its obligation to provide access to its OSS—the systems, databases, and personnel necessary to support the network elements or services. Nondiscriminatory access to OSS ensures that new entrants have the ability to order service for their customers and communicate effectively with BellSouth regarding basic activities such as placing orders and providing maintenance and repair services for customers. The Commission finds that, for each of the primary OSS functions (pre-ordering, ordering, provisioning,
