Intent to Prepare a Draft Environmental Impact Statement for the ACME Basin B Discharge Project

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DoD.

ACTION: Notice of intent.

SUMMARY: The U.S. Army Corps of Engineers (Corps), Jacksonville District intends to prepare an integrated Project Implementation Report/Draft Environmental Impact Statement (PIR/DEIS) for the ACME Basin B Discharge Project. The study is a cooperative effort between the Corps and the South Florida Water Management District (SFWMD), which is also a cooperating agency for this DEIS. One of the recommendations of the final report of the Central & South Florida (C&SF) Comprehensive Review Study (Restudy) was the implementation of Other Project Elements (OPE) including the ACME Basin B Discharge Project. This project is intended to provide water quality treatment and possible temporary storage of stormwater for the Acme basin within the Village of Wellington prior to discharge to the Arthur R. Marshall Loxahatchee National Wildlife Refuge. Excess water may be used to meet water supply demands in central and southern Palm Beach County. This project is a component of the Comprehensive Everglades Restoration Plan, a multi-year effort to restore the greater Everglades ecosystem while providing water supply and other water-related benefits to South Florida over many decades.
