

north-northwest of the Toquop Wash plant site. This alternative site would be adjacent to and contiguous with the proposed wellfield in the Tule Desert. That wellfield is necessary for the Proposed Action and both action alternatives. These proposed land exchanges are part of the Proposed Action and action alternatives being addressed in this Draft Caliente MFP Amendment/DEIS. To proceed with the land exchange, the public land to be disposed of must be identified in the Caliente MFP as being suitable for disposal through sale or exchange. It has been determined that additional analysis is needed in the Caliente MFP for the 640 acres of public land that have been identified for exchange under the Proposed Action or action alternatives. Therefore, this document contains a focused Plan Amendment that addresses the proposed land exchange. The Pah Rah section of land to be acquired already meets the criteria for land acquisition in the Lahonton RMP, which is contained within the Consolidated RMP developed and administered by the BLM's Carson City Field Office. Therefore, no amendments to those RMPs are needed. The project might optionally proceed by building the power plant on public land with the issuance of appropriate ROWs from the BLM.

Public participation is occurring throughout the processing of this project. A Notice of Intent was published in the **Federal Register** on November 7, 2001. Two rounds of public meetings were held. Comments presented throughout the process have been considered.

Dated: April 10, 2002.

Associate Field Manager.

BILLING CODE 4410-15-M

DEPARTMENT OF LABOR

Employment Standards Administration

Wage and Hour Division; Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR part I, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in

accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein. Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, NW., Room S-3014, Washington, DC 20210.
