Please direct comments on the proposed relocation and scope of the EA, requests for copies of the EA, and questions concerning the project to: Mr. Timothy A. Frazier, U.S. Department of Energy, P.O. Box 66, Miamisburg, OH 45343-0066, Telephone: (937) 865-3748, Facsimile (937) 865-4489, Electronic mail: Tim.Frazier@hq.doe.gov. For general information on DOE's NEPA process, please contact Ms. Carol Borgstrom, Office of NEPA Policy and Compliance, U.S. Department of Energy, 1000 Independence Avenue, SW, Washington, DC 20585, telephone (202) 586-4600 or leave message at 1-(800) 472-2756.

SUPPLEMENTARY INFORMATION:

Background

DOE and its predecessor agencies have been developing HS/RPSs and supplying them to user agencies for more than 35 years. The radioisotope used in these systems is plutonium-238 (Pu-238), a non-fissile, non-weapons-usable form. A HS/RPS converts thermal energy that is generated by the spontaneous radioactive decay of Pu-238 to electrical energy. These systems have demonstrated their value as key technologies in various harsh, remote, and inaccessible environments, such as space, where it is impractical to provide the fuel and maintenance that conventional electrical power sources would need. The HS/RPS assembly and test operations have been conducted at the Department's Mound site for over 15 years. The HS/RPS assembly and test operations are contained in one building at the Mound site. The HSs are assembled in glove boxes (large enclosures that separate workers from equipment used to process hazardous and nuclear materials while allowing

the workers to be in physical contact with the equipment) using parts manufactured or procured by the Mound site and encapsulated Pu-238 shipped from the Los Alamos National Laboratory in New Mexico. The RPSs are assembled in a large inert atmosphere chamber and then tested.

The Mound site was established in 1946 as the first permanent installation associated with the Atomic Energy Commission. Until the early 1990s, the Mound site manufactured critical nuclear weapons components. The site is currently being environmentally restored under a Comprehensive Environmental Response, Compensation and Liability Act Section 120 agreement. DOE plans to complete the environmental restoration and release the site for public use by February 2006. It is anticipated that the future use of the site will involve establishment of an industrial park.

Purpose and Need

It is DOE's responsibility to maintain the availability of HS/RPS for other Federal agencies, as needed. The radioisotope Pu-238 used in the assembly of HS/RPS is a special nuclear material requiring security and safeguards. As long as other programs requiring security and safeguards were also conducted the security costs at the site were spread among all such programs. However, once the site is cleaned up and released for public use, HS/RPS operations would be the only such DOE program remaining at the site, and all of the security costs would then have to be borne by that program. In 1999, the Department consolidated HS/RPS operations in a single building to minimize the security and safeguards costs. However, due to additional security measures for the special nuclear materials necessitated by the terrorist attacks of September 11, 2001, those costs have increased considerably. These security costs could render continuation of the program, as currently configured at the Mound site, impractical. Hence the Department proposes to evaluate modifications to its HS/RPS operations at the Mound site as well as alternative DOE sites which already have the added security/safeguards infrastructure in place for other ongoing programs and which would also have facilities suitable for the transfer of assembly and test operations for HS/RPSs.

The EA will analyze the potential environmental impacts associated with the HS/RPS operations at Mound and each of the alternative sites, including any other reasonable site(s) identified

during scoping, as well as the transportation routes associated with alternative sites. The following issues have been tentatively identified for analysis in the EA: health and safety, waste management, pollution prevention, hazardous materials, radiation materials, water resources, air quality, earth resources, land use, infrastructure, transportation, noise, ecological resources, cultural resources, socioeconomics, and environmental justice. This list is neither intended to be all-inclusive nor is it a predetermined of potential environmental impacts. The list is presented to facilitate comment on the scope of the EA.

The purpose of this Notice is to encourage public involvement in the NEPA process and to solicit comments on the proposed scope of the EA and the potential environmental impacts of the alternatives. Comments will be considered in preparation of the EA, which is expected to be issued for public and agency comments in July 2002. The Department will finalize the EA and decide whether to issue a Finding of No Significant Impact or prepare an EIS.

Issued in Washington, DC, May 24, 2002.

Director, Office of Nuclear Energy, Science and Technology.
