

golden sedge, mountain plover, San Diego ambrosia, southern California mountain yellow-legged frog, coastal cutthroat trout, slickspot peppergrass, and desert yellowhead.

Finally, work on a proposed rule for *Botrychium lineare*, with a listing priority number of 11, is also precluded by the need to issue proposed rules for higher priority species, particularly those facing high-magnitude, imminent threats (i.e., listing priority numbers of 1, 2, or 3).

Below, we provide information on the biology, current status, and threats to *Botrychium lineare*. More complete information, including references, are found in the candidate form. You may obtain a copy of this form from the Regional Director (TE), U.S. Fish and Wildlife Service, Eastside Federal Complex, 911 N.E. 11th Avenue, Portland, Oregon 97232-4181 (503/231-6158), or from the Service's web site: <http://endangered.fws.gov/>. You may also direct general comments or questions to this address. We will consider all information provided in response to this notice of review in deciding whether to propose *Botrychium lineare* for listing and when to undertake necessary listing actions. Comments received will become part of the administrative record for the species.

Biological Information

Botrychium lineare (slender moonwort) (Ophioglossaceae) is a small perennial fern that is currently known from a total of 9 (possibly 11) populations in Colorado, Oregon, Montana, and Washington. Surveys conducted in 2001 identified two new *Botrychium lineare* populations in Idaho and Nevada on the basis of their plant morphology, although Farrar (Iowa State University, *in litt.* 2002) stated that their identity should be verified by enzyme electrophoresis. Historic populations were previously known from Idaho (Boundary County), Montana (Lake County), California (Fresno County), Colorado (Boulder County), and Canada (Quebec and New Brunswick), have not been seen for at least 20 years and may be extirpated (Wagner and Wagner 1994). Known threats to populations of this species include road maintenance, herbicide spraying, trampling by recreational foot or vehicle traffic, timber harvest, trampling and grazing by wildlife and livestock, exotic species, and development. Because we concluded that the overall magnitude of threats to *Botrychium lineare* throughout its range is moderate, and the overall immediacy of these threats is non-imminent, we

assigned this species a listing priority number of 11. We assign this number based on the immediacy and magnitude of threats, as well as on taxonomic status. We published a complete description of our listing priority system in a September 21, 1983, **Federal Register** notice (48 FR 43098).

Progress in Revising the Lists

As described in section 4(b)(3)(B)(iii) of the Act, in order for us to make a warranted but precluded finding on a petitioned action, we must be making expeditious progress to add qualified species to the Lists and to remove from the Lists species for which the protections of the Act are no longer necessary. This notice describes our progress in revising the lists with regards to the slender moonwort since our October 30, 2001, publication of the last CNOR. We intend to publish such descriptions annually as part of the Candidate Notice of Review.

Our progress in listing and delisting qualified species since October 30, 2001, is represented by the publication in the **Federal Register** of final listing actions for 6 species, emergency listing actions for 3 species, proposed listing actions for 10 species, and proposed delisting actions for 3 species. In addition, we proposed critical habitat for 184 listed species, repropoed critical habitat for 215 species, and finalized critical habitat for 3 listed species. Given our limited budget for implementing section 4 of the Act, these achievements constitute expeditious progress.

Request for Information

Although we are not proposing a listing priority change or removal of candidate status at this time, any new information we receive on the distribution of and threat/conservation actions for *B. lineare* may have a bearing on whether listing under the Act is still warranted. We request you submit any further information on this species as soon as possible or whenever it becomes available. We especially seek information:

- (1) Indicating that we should remove this species from candidate status;
- (2) Recommending areas that we should designate as critical habitat for *Botrychium lineare*, or indicating that designation of critical habitat would not be prudent for the species;
- (3) Documenting threats to *Botrychium lineare*;
- (4) Describing the immediacy or magnitude of threats facing *Botrychium lineare*;

(5) Pointing out taxonomic or nomenclatural changes for *Botrychium lineare*; or

(6) Noting any mistakes, such as errors in the indicated historical range.

DEPARTMENT OF THE INTERIOR

National Park Service

Termination of the Environmental Impact Statement on the Spruce Creek Access Proposal, Denali National Park and Preserve, Alaska

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The National Park Service (NPS) is terminating an environmental impact statement (EIS) to evaluate an application for a right-of-way permit to a private inholding on Spruce Creek in the Kantishna Hills of Denali National Park and Preserve for the purpose of constructing and operating a remote lodge. The NPS released a draft EIS in July 1999 (published by NPS at 64 FR 41944, August 2, 1999, and by EPA at 64 FR 42942, August 5, 1999), and the public comment period ended October 6, 1999. The applicants requested in May 2000 that NPS not release the final EIS while they considered an NPS offer to purchase the property. The NPS purchased the land and all commercial use rights in February 2002. The former owners reserved rights to two one-acre parcels with cabins for their private, personal use and they requested NPS terminate the EIS.

The owners of the personal, non-commercial rights on the two one-acre parcels have requested access over the existing mining access trails and use of the existing Glen Creek airstrip pursuant to the Alaska National Interest Lands Conservation Act of 1980, Section 1110(b)—Access to Inholdings. In consultation with the NPS the

applicants propose minor new road construction to avoid driving in the bed of Spruce Creek. The new access request would require much less construction and result in less adverse impact on park resources and values than the original access request to construct and operate a lodge. NPS is issuing an environmental assessment (EA) to evaluate the impacts of the new access request and alternatives. The EA will be made available to those who commented on the draft EIS and other interested parties.

FOR FURTHER INFORMATION CONTACT: Paul R. Anderson, Superintendent, Denali National Park and Preserve, P.O. Box 9, Denali Park, Alaska 99755. Telephone (907) 683-9581.

Fish and Wildlife Service

North American Wetlands Conservation Council (Council) Meeting Announcement

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of meeting.

SUMMARY: The Council will meet to select North American Wetlands Conservation Act (NAWCA) proposals for recommendation to the Migratory Bird Conservation Commission. The meeting is open to the public.

DATES: July 9, 2002, 8:30 a.m.

ADDRESSES: The meeting will be held at the Laurel Point Inn, 680 Montreal Street, Victoria, British Columbia V8V1Z8. The Laurel Point Web site is www.laurelpoint.com. The Council Coordinator is located at U.S. Fish and Wildlife Service, 4401 N. Fairfax Drive, Suite 110, Arlington, Virginia, 22203.

FOR FURTHER INFORMATION CONTACT: David A. Smith, Council Coordinator, (703) 358-1784 or dbhc@fws.gov.

SUPPLEMENTARY INFORMATION: In accordance with NAWCA (Pub. L. 101-233, 103 Stat. 1968, December 13, 1989, as amended), the State-private-Federal Council meets to consider wetland acquisition, restoration, enhancement and management projects for recommendation to, and final funding approval by, the Migratory Bird Conservation Commission. Proposals require a minimum of 50 percent non-Federal matching funds.

Dated: May 20, 2002.

Thomas O. Melius,

Assistant Director, Migratory Birds and State Programs, Fish and Wildlife Service.

DEPARTMENT OF THE INTERIOR

National Park Service

Environmental Statements; Notice of Availability; Wilson's Creek National Battlefield, MO

AGENCY: National Park Service.

ACTION: Notice of availability of the draft general management plan/draft environmental impact statement for Wilson's Creek National Battlefield.

SUMMARY: Pursuant to section 102(2) of the National Environmental Policy Act of 1969, the National Park Service (NPS) announces the availability of the draft general management plan/draft environmental impact statement (DGMP/DEIS) for Wilson's Creek National Battlefield (Battlefield).

DATES: There will be a 60-day public review period for comments on this DGMP/DEIS. Comments on the DGMP/DEIS must be received 60-days after the Environmental Protection Agency publishes its notice of availability in the **Federal Register** or following an announcement in local papers, which ever is published later. Two public open houses for information about, or to make comment on the DGMP/DEIS will be held in or around Springfield, Missouri. Information about time and place will be available by contacting the park at the address below. Open house schedules will be published in local papers.

ADDRESSES: Copies of the DCMP/DEIS are available upon request by writing to Wilson's Creek National Battlefield, 6424 W. Farm Road 182, Republic, Missouri, 65738-9514. The document can be picked-up in person at the Battlefield's headquarters located at the address above.

FOR FURTHER INFORMATION CONTACT: Superintendent, Wilson's Creek National Battlefield 6424 W. Farm Road 182, Republic, Missouri, 65738-9514, or at telephone number 417-732-2662.

SUPPLEMENTARY INFORMATION: The purpose of the general management plan (GMP) is to set forth the basic management philosophy for the Battlefield and to provide the strategies for addressing issues and achieving identified management objectives. The DGMP/DEIS describes and analyzes the environmental impacts of a proposed

action and one action alternatives for the future management direction of the Battlefield. A no action alternative is also evaluated. Alternative B, *Wilson's Creek National Battlefield Commemoration*, the preferred alternative, would focus on efforts to commemorate the Battle of Wilson's Creek and emphasize a reflective and contemplative visitor experience. Recreational use would be allowed but would be managed so as not to conflict with the core mission of the park or the primary visitor experience. Alternative C, *Wilson's Creek Civil War Research Center*, would focus on Wilson's Creek distinctive combination of site integrity and artifact and archival collections in developing the park as an outstanding research center. Alternative A, the no action alternative, would continue management of the Battlefield as it is. Existing programs and program emphasis would not change.

Persons wishing to comment may do so by one of several methods. They may attend the open houses noted above. They may mail comments to Superintendent, Wilson's Creek National Battlefield, 6424 W. Farm Road 182, Republic, Missouri, 65738-9514. They also may hand-deliver comments to the Battlefield at the above address.

If individuals submitting comments request that their name and/or address be withheld from public disclosure, it will be honored to the extent allowable by law. Such requests must be stated prominently in the beginning of the comments. As always, the NPS will make available to public inspection all submissions from organizations or businesses and from persons identifying themselves as representatives or officials of organizations and businesses. Anonymous comments will not be considered.

The responsible official is Mr. William Schenk, Midwest Regional Director, National Park Service.

Dated: April 8, 2002.

David N. Given,

Acting Regional Director, Midwest Region.
