DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petitions for Modification

The following parties have filed petitions to modify the application of existing safety standards under section 101(c) of the Federal Mine Safety and Health Act of 1977.

1. Consolidation Coal Company

[Docket No. M-2002-045-C]

Consolidation Coal Company, Consol Plaza, 1800 Washington Road, Pittsburgh, Pennsylvania 15241-1421 has filed a petition to modify the application of 30 CFR 75.364(b)(2) (weekly examination) to its Blacksville No. 2 Mine (I.D. No. 46-01968) located in Monongalia County, West Virginia. The petitioner proposes to establish check point numbers B-CK-1, CK-2 and B-CK-3 to measure air quality and quantity at the inlet to the affected aircourse. The petitioner will also establish check point numbers B-CK-4, B-CK-5 and B-CK-6 to measure air quality and quantity at the outlet from the affected aircourse. The petitioner states that due to deteriorating roof conditions, traveling the affected areas of the return aircourse would expose persons to hazardous conditions. The petitioner asserts that the check points and all approaches to the check points will be maintained in a safe condition and a certified person will test the methane and quantity of air at each check point on a weekly basis. The petitioner asserts that the proposed alternative method would provide at least the same measure of protection as the existing standard.

Request for Comments

Persons interested in these petitions are encouraged to submit comments via e-mail to "comments@msha.gov," or on a computer disk along with an original

hard copy to the Office of Standards, Regulations, and Variances, Mine Safety and Health Administration, 4015 Wilson Boulevard, Room 627, Arlington, Virginia 22203. SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultant program to provide the public with an opportunity to comment on proposed and continuing information-collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and cost) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information-collection burden is correct.

The Crawler, Locomotive and Truck Crane Standard (i.e., "the Standard") specifies the following paperwork requirements, as well as how they use it.

Paragraph (b)(2) requires the employer to prepare and maintain a certification record which includes the date, listing of critical items inspected, signature of person performing the inspections, and a serial number or identifier of the crane inspected as specified in ANSI B30.5-1968, Safety Code for Crawler, Locomotive and Truck Cranes.

Establishing and maintaining written records of the monthly inspections informs employers and employees regarding serious, life threatening equipment failure.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information-collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and cost) of the information-collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information-collection and -transmission techniques.

III. Proposed Actions

OPSHA proposes to extend OMB's previous approval of the recordkeeping (paperwork) requirement specified in paragraph (b)(2) of the Crawler, Locomotive and Truck crane Standard (29 CFR 1926.550). OSHA is proposing to decrease the number of burden hours for the paperwork requirement specified by the Standard. This decrease is due to the increasing number of crawler, locomotive or truck cranes that are owned by rental companies which establish and maintain written records as a usual and customary business practice. The Agency will summarize the comments submitted in response to this notice, and will include this summary in its request to OMB to extend the approval of this information-collection requirement.

Type of Review: Extension of currently approved information-collection requirements.

Title: Crawler, Locomotive and Truck Crane Standard.

OMB Number: 1218-0232.

Affected Public: Business or other for-profit; not-for-profit institutions; Federal government; State, local or tribal governments.

Number of Respondents: 21,238.

Frequency of Response: Monthly.

Total Responses: 254,856.

Average Time per Response: 30 minutes.

Estimated Total Burden Hours: 127,428.

Estimated Cost (Operation and Maintenance): \$0.

IV. Authority and Signature

John L Henshaw, Assistant Secretary of Labor of Occupational Safety and Health, directed the preparation of this notice. The authority for this notice is the Paperwork Reduction Act of 1995 (44 U.S.C. 3506) and Secretary of Labor's Order No. 3-2000 (65 FR 50017).

Signed at Washington, DC, on June 3rd, 2002.
