SUPPLEMENTARY INFORMATION:

ICR Title: Application for New and Amended Pesticide Registration (EPA ICR 0277.13, OMB Control No. 2070-0060).

ICR Status: This is a request for extension of an existing approved collection that is currently scheduled to expire on April 30, 2002. EPA is asking OMB to approve this ICR for three years. Under 5 CFR 1320.12(b)(2), the Agency may continue to conduct or sponsor the collection of information while the submission is pending at OMB.

Abstract: This information collection activity is designed to provide EPA with necessary data to evaluate an application of a pesticide product as required under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) (7 U.S.C. 136). Under FIFRA, EPA must evaluate pesticides thoroughly before they can be marketed and used in the United States to ensure that they will not pose unreasonable adverse effects to human health and the environment. Pesticides that meet this test are granted a license or "registration" which permits their distribution, sale and use according to requirements set by EPA to protect human health and the environment. An individual or entity wanting to obtain a registration for a pesticide product must submit an application package consisting of information relating to the identity and composition of the product, proposed labeling, and supporting data (or compensation for others' data) for the product as outlined in 40 CFR part 158. The EPA bases registration decisions for pesticides on its evaluation of a battery of test data provided primarily by applicants for registration. Required studies include testing to show whether a pesticide has the potential to cause unreasonable adverse human health or environmental effects.

Burden Statement: The annual "respondent" burden for this ICR is estimated to be 152,974 hours, with individual respondent burden ranging from 14 hours to 194 hours per submission, depending upon the type of registration activity involved. According to the Paperwork Reduction Act (PRA), "burden" means the total time, effort, or

financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information. The Agency may not conduct or sponsor, and a person is not required to respond to a collection of information that is subject to approval under the PRA, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's information collections appear on the collection instruments or instructions, in the **Federal Register** notices for related rulemakings and ICR notices, and, if the collection is contained in a regulation, in a table of OMB approval numbers in 40 CFR part 9.

The following is a summary of the burden estimates taken from the ICR:

Respondents/affected entities: Pesticide Manufacturers Applying for Registration.

Estimated total number of potential respondents: 2,100.

Frequency of response: As needed.

Estimated total/average number of responses for each respondent: 3.

Estimated total annual burden hours: 152,974

Estimated total annual non-labor costs: \$0.

Changes in the ICR Since the Last Approval: The total annual burden associated with this ICR has decreased by 34,666 hours, from 187,640 hours in the previous ICR to 152,974 hours for this renewal ICR. The change is primarily related to a decrease in the number of responses required by one of the pesticide registration divisions, and is described in detail in the ICR.

According to the procedures prescribed in 5 CFR 1320.12, EPA has submitted this ICR to OMB for review and approval. Any comments related to the renewal of this ICR should be submitted within 30 days of this notice, as described above.

Dated: May 29, 2002

Director, Collection Strategies Division.

SUPPLEMENTARY INFORMATION:

Title: Stratospheric Ozone Protection, Servicing of Motor Vehicle Air Conditioners, OMB Control Number 2060-0247, EPA ICR Number 1617.04, expiration date May 31, 2002. This is a request for extension of a currently approved collection.

Abstract: In 1992, EPA developed regulations under section 609 of the Clean Air Act Amendments of 1990 (Act) for the recycling of chlorofluorocarbons in motor vehicle air conditioners. These regulations were published in 57 FR 31240, and are codified at 40 CFR part 82, subpart B.

Automotive technicians are required to be certified in the proper use of recycling equipment for servicing motor vehicle air conditioners. The Global Programs Division (GPD) requires that certification programs send full sets of their training materials to EPA for approval and that technicians provide a copy of their testing program.

The GPD requires independent laboratories to submit an application that proves their general capacity to certify equipment to meet the Society of Automotive Engineers (SAE) J standards for recycled refrigerant. An independent laboratory that is interested in testing recycling and recovery equipment must submit an application to the GPD that includes a list of testing procedures and equipment that will be used in testing.

Motor vehicle air conditioner servicers must submit to the Administrator on a one-time basis a certificate that provides the following information: The name of the equipment owner, the address of the service establishment where the equipment will be used, and the make, model, year, and serial number of the equipment. Establishments that own recover-only equipment must maintain records of the name and address of the facility that is reclaiming their refrigerant.

Any person who owns approved refrigerant recovery or recycling equipment must retain records demonstrating that all persons authorized to operate the equipment are currently certified technician. Any person who sells or distributes refrigerant that is in a container of less than 20 pounds must verify that the purchaser is a certified technician, unless the purchase of small containers is for resale only. In that case, the seller must obtain a written statement from the purchaser that the containers are for resale only, and must indicate the purchaser's name and business address. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control

number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on December 20, 2001; no comments were received.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 8 minutes per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to, or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and collecting, validating, and verifying information, processing and maintaining information and, disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: New and used motor vehicle dealers, gasoline service stations, truck rental and leasing without drivers, passenger car rental, top, body, upholstery repair and paint shops, general automotive repair shops, automotive repair shops not elsewhere classified.

Estimated Number of Respondents: 24,012.

Frequency of Response: On occasion.

Estimated Total Annual Hour Burden: 6,882.

Estimated Total Annualized Non Labor Cost: \$0.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the addresses listed above. Please refer to EPA ICR No. 1617.04 and OMB Control No. 2060-0247 in any correspondence.

Dated: May 29, 2002.
