ACTION: Notice; request for nominations to the Drinking Water Contaminant Candidate List Working Group and Small Systems Affordability Working Group of the National Drinking Water Advisory Council.

SUMMARY: The Environmental Protection Agency (EPA) is announcing the formation of a Drinking Water Contaminant Candidate List (CCL) Working Group and Small Systems Affordability Working Group of the National Drinking Water Advisory Council (NDWAC), and soliciting nominations to these working groups. The Advisory Council was established to provide practical and independent advice, consultation, and recommendations to the Agency on the activities, functions, and policies related to the implementation of the Safe Drinking Water Act as amended.

The CCL serves as the primary source of priority contaminants for the Agency's drinking water program. The current version of the list is divided among priorities for drinking water research and those contaminants which are priorities for consideration for Agency determinations of whether or not to regulate specific contaminants. The list is comprised of both chemical and microbial contaminants that are known or anticipated to occur in public water systems, and may have adverse health effects, and which at the time of publication are not subject to any proposed or promulgated National Primary Drinking Water Standards. The first CCL contained 50 chemical and 10 microbial contaminants/groups and was developed based on the review of readily available information on
