

moderate to difficult opportunities. The trail access would be located between Silverwood Lake Recreation Area and Big Bear.

The trail would be three to five feet in width and would provide varying degrees of difficulty. In some areas, the trail would utilize short sections of existing roads. Information and interpretive signs would be placed at appropriate locations along the trail corridor and at access points (e.g. road intersections, trailheads, parking lots, etc.). The trail would include construction of up to 12 trailheads, accommodating three to ten vehicles each. This proposal includes the construction of four spur trails that would provide access for the mountain communities and to several points of interest. These spurs would connect the trail to Green Valley Lake, Butler Peak, Tunnel Two ridge, and Valley of Enchantment/Breezy Point. Alternatives have not been identified at this time. The FHWA and the Forest Service invite public comments on potential alternatives for the trail.

Construction would begin in late fall of 2003 or spring of 2004, with completion of the entire system by 2005.

As additional funding becomes available, the Forest would consider enhancing interpretation opportunities on the trail. The actions would be subject to separate environmental review. Construction of facilities along the trail or at access points (e.g. water and toilets) is not planned at this time.

Authorization

National Environmental Policy Act of 1969 as amended (42 U.S.C. 4321–4346), Council on Environmental Quality Regulations (40 CFR parts 1500–1508); U.S. Department of Agriculture NEPA Policies and Procedures (7 CFR part 1b).

Reviewer's Obligation

The Forest Service believes, at this early stage, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts the agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519, 553 (1978). Also, environmental objections that could be raised at the draft environmental impact stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *City of Angoon*

v. Hodel, 803 F.2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc. v. Harris*, 490 F. Supp. 1334, 1338 (E.D. Wisc. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the comment period so that substantive comments and objections are made available to the Forest Service at the time when it can meaningfully consider them and respond to them in the final environmental impact statement.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement. Reviewer may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.
