decisions were made as part of the 1995 Linuron RED and have been implemented. However, two new minor uses were established for linuron as part of the tolerance reassessment process for use on celeraic and rhubarb. An occupational risk assessment was performed for these two new uses and they do not present risks of concern for the Agency.

EPA works extensively with affected parties to reach the decisions presented in the FQPA tolerance reassessment decision documents. This Notice announces the availability of the linuron overview and decision document which report on FQPA tolerance reassessment and risk management decisions. These and additional supporting documents are available on the internet at *http://www.epa.gov/pesticides/reregistration/status.htm* and in the public docket, OPP–2002–0079. This Notice also announces the beginning of a 30–day public comment period. The docket is open and any comments submitted will be placed in the public docket for consideration. In the absence of substantive comments, the tolerance reassessment decision for linuron will be considered final.
