Approval and Promulgation of Air Quality Implementation Plans; Michigan

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve several rule revisions and rescissions for incorporation into Michigan's State Implementation Plan (SIP). The Michigan Department of Environmental Quality (MDEQ) submitted these revisions on July 7, 2000 and supplemented them with letters dated January 29, 2001, and February 6, 2002. They include revisions to definitions, open burning rules, general volatile organic compound (VOC) provisions, and administrative procedures, and the rescission of two obsolete rules. In the Final Rules section of this **Federal Register**, EPA is approving the state's SIP revision, as a direct final rule without prior proposal because the Agency views this as a noncontroversial revision and anticipates no adverse comments. A detailed rationale for the

approval is set forth in the direct final rule. If we receive no adverse comments in response to that direct final rule, we plan to take no further action in relation to this proposed rule. If we receive significant adverse comments, in writing, which we have not addressed, we will withdraw the direct final rule and address all public comments received in a subsequent final rule based on this proposed rule. The EPA will not institute a second comment period on this document.

DATES: EPA must receive written comments on or before July 29, 2002.

ADDRESSES: Send written comments to: Carlton Nash, Chief, Regulation Development Section, Air Programs Branch, (AR-18J), U.S. Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois, 60604.

Clean Air Act Proposed Approval of Revision to Operating Permits Program in Washington

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve, as a revision to Washington's title V air operating permits program, proposed revisions to Washington's regulations for insignificant emissions units and other proposed minor revisions to Washington's title V program. In a Notice of Deficiency published in the **Federal Register** on January 2, 2002 (67 FR 73), EPA notified Washington of EPA's finding that Washington's provisions for insignificant emissions units do not meet minimum Federal requirements for program approval. This program revision would resolve the
