SUPPLEMENTARY INFORMATION:

Description of Information Collection

Title: Secure Rural Schools and Community Self-Determination Act of 2000.

OMB Number: 0596-0165.

Expiration Date of Approval: 3/31/2002.

Type of Request: Extension with no revision.

Abstract: On May 23, 1908, the U.S. Congress enacted 16 U.S.C. 500, which created what is commonly known as the Twenty-Five Percent Fund. Under this act, States receive payment from the Federal Government of twenty-five percent of the revenues generated from the national forests that are located within their borders. On October 30, 2000, the Congress enacted the Secure Rural Schools, and Community Self-Determination Act (Public Law 106-393; hereafter, the act), which is intended to restore stability and predictability to the annual payments made to States and counties containing National Forest System lands and public domain lands managed by the Bureau of Land Management. Like the 25 percent fund, the counties may use the proceeds only for the benefit of public schools, roads, and other purposes.

The Secretary of Agriculture is directed to implement the act. Under the act, eligible counties and their States need to reach an agreement on the distribution of funds authorized by the act and the amount that each county will receive as its share of the State's full payment amount. Counties will need to determine whether they wish to continue to receive their share of the State's twenty-five percent payment or whether they choose their share of the

State's full payment amount through the act. A decision to receive a share of the State's 25 percent payment is effective for two years; a decision to receive a share of the act's full payment amount stays in effect through fiscal year 2006.

Those counties choosing the full payment and receiving more than \$100,000 under the act are required to make an election regarding the proportion of their funds (between fifteen and twenty percent) to be applied to Title II or Title III of the act. Title II allows the funds paid under the act to be used for special projects on Federal lands that meet the requirements described in Title II of the act, and Title III allows the funds to be spent on county projects that meet the requirements described under Title III of the act. Annually, each State Treasurer is requested to notify the Forest Service, by September 30, of the projected payment distributions to each county and, when required, each county's elected proportion of funds for Title II or for Title III.

Upon receipt, the Forest Service will evaluate the information from States in order to properly implement the act. States and counties must provide the requested information in order for the Forest Service to properly calculate and distribute the State's full payment amount authorized by Public Law 106-393 and, by extension, provide counties with their commensurate share of that full payment amount. This information collection is a vital and integral part of the Forest Service's ability to implement the act. Failure to implement the act would potentially lead to unnecessary harm to those schools and counties that benefit from the funds.

Estimate of Annual Burden: 30 minutes.

Type of Respondents: State Treasurers and Counties.

Estimated Annual Number of Respondents: 41.

Estimated Annual Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 22 hours per year.
