Stainless Steel Wire Rod from India: Extension of Time Limit of Preliminary Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of extension of time limit of the preliminary results of antidumping duty administrative review.

SUMMARY: The Department of Commerce ("the Department") is extending the time limits of the preliminary results of the antidumping duty administrative review of stainless steel wire rod ("SSWR") from India. This review covers the period December 1, 2000 through November 30, 2001.

EFFECTIVE DATE: July 9, 2002.

FOR FURTHER INFORMATION CONTACT: Stephen Bailey, AD/CVD Enforcement Group III, Office 9, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230; telephone: (202) 482-1102.

SUPPLEMENTARY INFORMATION:

Applicable Statute and Regulations

Unless otherwise indicated, all citations to the Tariff Act of 1930, as amended ("Act"), are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act. In addition, unless otherwise indicated, all citations to the Department's regulations are to the regulations codified at 19 CFR part 351 (2001).

Background

On January 29, 2002, we published a notice of initiation of a review of SSWR from India covering the period December 1, 2000 through November

30, 2001. *See Initiation of Antidumping and Countervailing Duty Administrative Reviews*, January, 22, 2002 (67 FR 4236). The Department's preliminary results are currently due on September 2, 2002.

Extension of Time Limit of Preliminary Results

Section 751(a)(3)(A) of the Act states that if it is not practicable to complete the review within the time specified, the administering authority may extend the 245-day period to issue its preliminary results by 120 days. Completion of the preliminary results of this review within the 245-day period is not practicable for the following reasons:

- The review involves four companies, a large number of transactions and complex adjustments.
- All companies include sales and cost investigations which require the Department to gather and analyze a significant amount of information pertaining to each company's sales practices, manufacturing costs and corporate relationships.

Therefore, in accordance with section 751(a)(3)(A) of the Act, we are extending the time period for issuing the preliminary results of review by 60 days until November 1, 2002. The final results continue to be due 120 days after the publication of the preliminary results.

Dated: July 1, 2002

Joseph A. Spetrini,

Deputy Assistant Secretary for Import Administration, Group III.

Application for Duty-Free Entry of Scientific Instrument

Pursuant to section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897; 15 CFR part 301), we invite comments on the question of whether an instrument of equivalent scientific value, for the purposes for which the instrument shown below is intended to be used, is being manufactured in the United States.

Comments must comply with 15 CFR 301.5(a)(3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, DC 20230. Applications may be examined between 8:30 a.m. and 5 p.m. in Suite 4100W, U.S. Department of

Commerce, Franklin Court Building, 1099 14th Street, NW., Washington, DC.

Docket Number: 02-024.

Applicant: Massachusetts Institute of Technology, Gas Turbine Laboratory, 31-265, 77 Massachusetts Avenue, Cambridge, MA 02139-4307.

Instrument: Universal 5 Axis High Speed Machining Center, Model UCP 600.

Manufacturer: Mikron, Switzerland.

Intended Use: The instrument is intended to be used to study electromechanics at micron to millimeter scale; micro fluid and structural mechanics; micro rotor dynamics and air bearing fluid flow. Micro motor/generator torque and efficiency versus speed, micro turbomachinery pressure, rise flow capacity and efficiency, micro rotor precession and whirl onset, microbearing load capacity and stability will be investigated. Micro motor/generator, jet engines and rocket turbopumps will be spun to high speed (over 1 million rpm) during which their electrical performance, pressure rise versus flow characteristics, efficiency, and rotor motion will be measured by optical techniques and micro-sensors. The instrument will also be used for educational purposes in two graduate level courses: (1) Aircraft Gas Turbine Structures and (2) Aircraft Gas Turbine Design.

Application accepted by Commissioner of Customs: June 13, 2002.

Gerald A. Zerdy,

Program Manager, Statutory Import Programs Staff.
