Pursuant to Section 36(b)(1)
of the Arms Export Control Act, as amended****Annex
Item No. vii****(vii) Sensitivity of Technology:**

1. The SM-2 Block IIIA STANDARD is a surfaced-launched guided missile. It is operational and deployed on cruisers and destroyers for use against air and surface threats (aircraft, missiles, and ships). The Guidance System employs a continuous-wave radar link for homing to a target. Steering Control Unit and roll commands from the adaptive Auto-pilot Battery Unit system provides flight stability via four aft mounted control surfaces. Propulsion is provided by a solid propellant Dual Thrust Rocket Motor that is an integral part of the missile airframe. The Target Detecting Device is a complex fuse with dual radar systems to optimize warhead lethality against a spectrum of target sizes and speeds. The telemeter unit transmits missile performance data to ground station to be analyzed for accuracy of missile/target scenario.

2. The SM-2 Block IIIA is classified Confidential. Certain operating frequencies and performance characteristics are classified Secret. The parametric documents, missile handling procedures, general performance data, firing guidance, dynamics information, flight analysis procedures, missile log books, propulsion data sheets, and Shore Activity Maintenance Data Sheets of the STANDARD missile documentation are classified up to Confidential.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that Canada can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.
