DEPARTMENT OF HEALTH AND HUMAN SERVICES**Agency for Healthcare Research and Quality****Request for Planning Ideas**

AGENCY: Agency for Healthcare Research and Quality, HHS

ACTION: Notice.

SUMMARY: The Agency for Healthcare Research and Quality (AHRQ) invites recommendations for future initiatives

in areas identified as priorities in the Agency's current strategic plan which can be viewed at <http://www.AHRQ.gov/about/stratpln.htm>. This plan describes the framework that the Agency will use to guide the development and implementation of budget proposals for Fiscal Years 2004 and 2005 as well as decisions on resource allocations for research, translation (including tool development), dissemination, and evaluation activities that will facilitate the implementation of research findings at all levels of the health care system.

Nature of Recommendations

AHRQ encourages written suggestions from users of AHRQ research information and stakeholders for future Agency activities. Submissions should provide the following:

- A description of the focus of the activity and its alignment with Agency priorities;
- The gap addressed by the proposal;
- The population addressed by the activity;
- An indication of the health care issues that are of most concern for the proponent (of the activity);
- Background information to help AHRQ assess the urgency of the need for the results of the proposed projects (*i.e.*, realizing that projects undertaken by the Agency will take a year [minimally] to begin, what is the magnitude of the problem addressed, how soon could the results be implemented, and what change would be anticipated);
- An estimate of the budget required to adequately address the proposed activity;
- Potential partners for the Agency; and
- A description of the desired end product(s) (research knowledge; information; tools such as instruments for measurements, databases, informatics, and other applications that can be used to assess and improve care; or systems intervention) and how the product could be used in the health care system.

One of the criteria that will be used in prioritizing suggestions submitted will be the extend to which customers and stakeholders can point to examples of how prior results of the Agency's work have been used to improve health care as well as the impact of this use on quality, outcomes, costs, use or access.

DATES: The responses to this request will be accepted on an ongoing basis.

ADDRESSES: Submissions should be brief (no more than three pages) and may be in the form of a letter, preferably with an electronic file in a standard word processing format on a 3½ floppy disk,
