Compliance: Required as indicated, unless accomplished previously.

To prevent incapacitation of the flightcrew due to lack of oxygen, which could result in

loss of control of the airplane, accomplish the following:

Revision to the Airplane Flight Manual

(a) Within 90 days after the effective date of this AD, accomplish paragraph (a)(1) or (a)(2) of this AD, as applicable, to advise the flightcrew to don oxygen masks as a first and immediate step when the cabin altitude warning horn sounds.

(1) For Model A300 series airplanes, revise the Emergency Procedures section of the FAA-approved Airplane Flight Manual (AFM). This may be accomplished by inserting a copy of this AD in the AFM.

“EMERGENCY PROCEDURES**CABIN DEPRESSURIZATION**

Removal of AD From AFM

(b) When the information included in the AFM procedures specified in paragraphs (a)(1) and (a)(2) of this AD has been incorporated into the FAA-approved general revision of the AFM, and the information contained in the general revision is identical to that specified in this AD, this AD may be removed from the AFM.

Alternative Methods of Compliance

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA. Operators shall submit their requests through an appropriate FAA Principal Operations Inspector, who may add comments and then send it to the Manager, International Branch, ANM–116.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from International Branch, ANM–116.

Special Flight Permits

(d) Special flight permits may be issued in accordance with §§ 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Proposed Amendment to Class E Airspace; Mount Pocono, PA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This action proposes to amend the Class E airspace area at Mount Pocono, PA. The development of an Area Navigation (RNAV) Global Positioning System (GPS) Standard Instrument Approach Procedure (SIAP) for the Pocono Mountains Municipal Airport (KMPO), Mount Pocono, PA, has made this proposal necessary. Sufficient controlled airspace is needed to accommodate the SIAP and for Instrument Flight Rules (IFR) operations to the airport. The area would be

depicted on aeronautical charts for pilot reference.

DATES: Comments must be received on or before August 16, 2002.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Airspace Branch, AEA–520, Docket No. 02–AEA–09, Eastern Region, 1 Aviation Plaza, Jamaica, NY 11434–4809.

Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Office of the Regional Counsel, AEA-7, Eastern Region, 1 Aviation Plaza, Jamaica, NY 11434-4809. Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2A, which describes the application procedure.

The Proposal

The FAA is considering an amendment to Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to amend the Class E airspace area at Mount Pocono, PA. The development of a SIAP to serve flights operating IFR into the airport makes this action necessary. Controlled airspace extending upward from 700 feet AGL within a 6.4 mile radius of the airport and an 8 mile wide corridor extending to 8.6 miles northwest of the airport is needed to accommodate the SIAP. Class E airspace designations for airspace areas extending upward from 700 feet or more above the surface are published in Paragraph 6005 of FAA Order 7400.9J, dated August 31, 2001, and effective September 16, 2001, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that would only affect air traffic procedures and air navigation, it is certified that this proposed rule would not have significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
