**Agency Information Collection Activities: Proposed Collection: Comment Request**

In compliance with the requirement for opportunity for public comment on proposed data collection projects (section 3506(c)(2)(A) of Title 44, United States Code, as amended by the Paperwork Reduction Act of 1995, Public Law 104-13), the Health Resources and Services Administration (HRSA) publishes periodic summaries of proposed projects being developed

for submission to OMB under the Paperwork Reduction Act of 1995. To request more information on the proposed project or to obtain a copy of the data collection plans and draft instruments, call the HRSA Reports Clearance Officer on (301) 443-1129.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

**Proposed Project: Emergency Medical Services for Children (EMSC) Grantee Survey—(NEW)**

Because of the differences in the way emergency medical services are managed and provided in different States and the challenges faced delivering services in different parts of the country, there are many unanswered questions about the overall capability of

these systems to respond to emergencies. In order to improve the quality of EMSC, more information is needed to identify State needs and resources.

HRSA is therefore planning to conduct a needs assessment to obtain information about the characteristics of State EMS systems, and the degree to which they have been adapted to address the needs of children. The results of this assessment will be used to determine funding priorities, including development of appropriate guidelines and provision of technical assistance to States, demonstration grants, information collection and sharing among State agencies, and training programs for health professionals.

HRSA has included national performance measures for EMSC in this survey in accordance with the requirements of the "Government Performance and Results Act (GPRA) of 1993" (Public Law 103-62). This act requires the establishment of measurable goals for Federal programs that can be reported as part of the budgetary process, thus linking funding decisions with performance.

The estimated response burden is as follows:

Type of form	Number of respondents	Responses per respondent	Burden hours per response	Total burden hours
Self Assessment questionnaire .....	56	1	10	560

**Agency Information Collection Activities: Proposed Collection; Comment Request**

In compliance with section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 concerning opportunity for public comment on proposed collections of information, the Substance Abuse and Mental Health Services Administration will publish periodic summaries of proposed

projects. To request more information on the proposed projects or to obtain a copy of the information collection plans, call the SAMHSA Reports Clearance Officer on (301) 443-7978.

Comments are invited on: (a) Whether the proposed collections of information are necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the

collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

*Proposed Project: Drug Abuse Warning Network (OMB number 0930-0074, revision)*—The Drug Abuse Warning Network (DAWN) is an ongoing data system that currently collects information on drug abuse-related medical emergencies and deaths as reported from about 466 hospitals and 137 medical examiners/coroners (ME/C) nationwide. DAWN provides national and metropolitan estimates of substances involved with drug-related ED visits; disseminates information about substances involved in deaths investigated by participating ME/Cs; provides a means for monitoring drug

abuse patterns, trends, and the emergence of new substances; assesses health hazards associated with drug use; and generates information for national and local drug abuse policy and program planning. DAWN data are used by Federal, State, and local agencies, as well as universities, pharmaceutical companies, and the press.

The current emergency department (ED) sample supports estimates for the coterminous U.S. and 21 major metropolitan areas. Beginning in 2003, the DAWN case definition will be changed to obtain more consistent and reliable data on drug abuse cases and also will capture additional cases where drug use/misuse led to ED visits or deaths for conditions such as adverse drug reactions, underage drinking and

malicious poisonings. To achieve better geographic and population coverage, the ED sample will be expanded to support estimates for the full U.S. and 48 metropolitan areas. By the end of 2005, the sample will include approximately 841 hospitals. To achieve complete coverage, approximately 66 non-participating ME/C jurisdictions in the 48 metropolitan areas targeted for the ED expansion will be added in lieu of a sample. Facilities (EDs and ME/Cs) will continue to use the current forms in early 2003 to complete reporting on events occurring through December 2002, but will use the revised forms for all events occurring from 1/1/2003 forward.

The annual burden estimates are shown below.

ANNUALIZED REPORTING BURDEN FOR DAWN: CLOSEOUT 2002 <sup>1</sup>
