SUPPLEMENTARY INFORMATION: The No Child Left Behind Act of 2001, Public Law 107-110, authorizes the Department to promulgate several regulations using negotiated rulemaking. The purpose of the regional consultation meetings is to allow tribal officials, parents, teachers, administrators, educators at Bureau schools, and school board members of tribes served by Bureau-funded schools to provide guidance to the Secretary on the content of the regulations. As part of providing guidance to the Secretary, the meetings are intended to identify interests and define issues for

recommendations for negotiated rulemaking under the Act and under the Negotiated Rulemaking Act and the Federal Advisory Committee Act.

This consultation will cover six sections of the Act that provide for negotiated rulemaking regarding Bureau-funded schools. The Committee will develop recommendations for proposed regulations that will:

(1) *Under Section 1124*—establish separate geographic attendance areas for each Bureau-funded school;

(2) *Under Section 1127*—establish a formula for determining the minimum annual amount of funds necessary to fund each Bureau-funded school;

(3) *Under Section 1130*—establish a system for the direct funding and support of all Bureau-funded schools under the formula established under Section 1127;

(4) *Under Section 1136*—establish guidelines to ensure the constitutional and civil rights of Indian students

regarding the right to privacy, freedom of religion and expression, and due process in connection with disciplinary actions (suspension and expulsion);

(5) *Under Section 1043*—establish a method for the administration of grants under the Tribally Controlled Schools Act of 1988, as amended by Section 1043; and

(6) *Under Section 1116(g)*—define “Adequate Yearly Progress” which is the essential measurement for determining that schools are providing quality education.

A third-party neutral facilitator will facilitate each consultation meeting. Interpreters will be available, as needed.

The results of this consultation will provide guidance to the negotiated rulemaking committee. The Committee, in its advisory capacity, will develop recommendations for the Secretary for proposed regulations to be published by June 2003.

SUPPLEMENTARY INFORMATION:

I. Background

A notice published by OMB in the **Federal Register**, dated January 3, 2002 (67 FR 369), and reissued February 22, 2002 (67 FR 8451), directed Federal agencies to issue and implement guidelines to ensure and maximize the quality, objectivity, utility, and integrity of Government information disseminated to the public. On May 24, 2002, the Department of the Interior published a **Federal Register** notice providing the web site where Departmental Information Quality Guidelines may be reviewed, and directing its offices and bureaus to publish by July 1, 2002, a notice of availability of their own Guidelines in the **Federal Register** for public comment. We are issuing these proposed Information Quality Guidelines in order to comply with this direction.

OSM, which includes Headquarters, three Regional Offices, and ten Field Offices, disseminates a wide variety of information to the public regarding the nation's surface coal mining and reclamation activities on Federal, tribal or other lands within states which may include state or privately-owned lands. The disseminated information includes organizational and management information, programs and services products, research and statistical reports, policy and regulatory information, and general reference material. We will evaluate and identify the types of information that we disseminate that will be subject to these guidelines, once finalized.

II. Information Quality Standards

To the greatest extent practicable and appropriate, information we disseminate is internally reviewed for quality—including objectivity, utility, and integrity—before such information is disseminated.

1. Information we disseminate to the public is normally subject to one or more levels of internal staff, or supervisory review for quality before we disseminate the information.

2. The number of levels of internal quality review applied in a particular case depends on the nature, scope, and purpose of the information to be disseminated. For example, routine reports that may be prepared by staff about the agency's activities or operations may be subject to one or two levels of staff or supervisory review for
