

The measurement of these dimensions will require a standardized instrument that produces reliable and valid results.

Furthermore, the National Quality Forum (NQF) has cited the need for further research and development of suitable performance measures to evaluate and improve the quality of care in the hospital setting. Among the many priorities cited by the NQF in this area, the need to measure patient experiences with inpatient care is crucial.

In an effect to address the concerns of the industry, the Acting Director of AHRQ and the Administrator of the Centers for Medicare & Medicaid Services (CMS) have established a priority to develop a standard for measuring and the public reporting of patient experiences in the acute care setting.

AHRQ, through a collaborative process with CMS and other Federal agencies, as well as other stakeholders, has initiated the process for this project. The steps to advance this initiative include:

- *Stakeholder Meetings:* A series of public meetings will be held to identify the issues, concerns and interests of the healthcare community. Summaries of all meetings will be posted on the AHRQ Website: <http://www.ahrq.gov/qual/cahpsix.htm>.

- *Sponsorship:* Identify potential sponsors who will fund, assist in development and periodic revisions, and ultimately help support the process for implementing and maintaining this standardized instrument.

- *Research Plan:* The process by which measures will be defined and applicable instruments identified. Instruments submitted will be evaluated to determine if they meet the measurement needs and to identify whether additional measure development is required. Once consensus among AHRQ and the CAHPS Grantees on the instrument is achieved, and the instrument testing is concluded, the resulting work will be readily available free of charge to all prospective users.

- *Implementation Plan:* A description of the recommended or required process to implement the standardized instrument will also be readily available including information related to data collection, analysis, and public reporting.

Dated: July 18, 2002.

Carolyn M. Clancy,
Acting Director.
